

# How to complete the Extended Minerals Reporting Template “EMRT”

## EMRT Rev. 1.2

June 2023

Japan Electronics and Information Technology Industries  
Association (JEITA)

- Responsible Minerals Trade Working Group -

**【Notice】**

This document is published by the JEITA Responsible Minerals Trade Working Group.  
We endeavor to ensure that our information on RMI templates for responsible mineral sourcing is as recent and accurate as possible, but please be aware that this will not always be the case.

# Table of Contents

## **1. What is the EMRT**

- 1.1 What is the EMRT?
- 1.2 Changes from the CRT/MRT
- 1.3 Comparison with the CMRT  
<Reference>

## **2. Background of survey and supply chains**

- 2.1 Cobalt
- 2.2 Mica

## **3. OECD Annex II Risk**

## **4. Conflict-Affected and High-Risk Areas (CAHRAs)**

- 4.1 Definition of CAHRAs in OECD
- 4.2 CAHRAs in EU Regulations
- 4.3 Definition in the EMRT

## **5. EMRT Rev. 1.2 Outline and Changes**

## **6. How to complete the EMRT**

- 6.1 Declaration Sheet
- 6.2 Smelter List Sheet
- 6.3 Product List Sheet
- 6.4 Checker Sheet

# 1. What is the EMRT?

# 1.1 What is the EMRT?

- ◆ The EMRT<sup>※1</sup> is a template developed by the RMI to facilitate the transfer of information through the supply chain regarding country of origin of minerals used in products, and the smelters, refiners and processors being utilized. It is also a tool that supports the exercise of due diligence by companies in accordance with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (CAHRAs<sup>※2</sup>).
  - ※1 EMRT stands for Extended Minerals Reporting Template
  - ※2 As for details of CAHRAs, please refer to P.17
- ◆ Currently, minerals covered by the EMRT are cobalt and natural mica (as of June 2023).
- ◆ The EMRT was released in October 2021 by RMI. The current version is ver.1.2 (as of June 2023).
- ◆ By the release of the EMRT, the existing CRT (the template for reporting cobalt) and MRT (the template for reporting mica) were deleted from RMI website in the end of March 2022.

# 1.2 Changes from the CRT/MRT

Item	CRT Rev. 2.2	MRT Rev. 1.0	EMRT Rev. 1.02
Background /Law	No compliance requirement Growing international interest in human rights issues, etc.	No compliance requirement Growing international interest in human rights issues, etc.	No compliance requirement Growing international interest in human rights issues, etc.
Issuance date	NA	NA	NA
Subject of regulations	NA	NA	NA
Minerals covered	Cobalt	Natural Mica *Only the name of processor	Cobalt Mica (Natural Mica) (*including whether such mineral was used)
Regions covered	CAHRAs (Conflict-Affected and High-Risk Areas)	NA (Survey only to identify the name of processors/No risks covered)	CAHRAs (Conflict-Affected and High-Risk Areas)
Risks covered	OECD Annex II Risks	NA (Survey only to identify the name of processors/No risk covered)	OECD Annex II Risks

◆CRT (the template for reporting cobalt) and MRT (the template for reporting mica) were deleted from RMI website in the end of March 2022

# 1.3 Comparison with the CMRT <Reference>

Item	CMRT Rev. 6.31		EMRT Rev. 1.2
Background/ law	US DFA Section 1502	EU Conflict Minerals Regulation	No compliance requirement Growing international interest in human rights issues, etc.
Issuance date	Applied as of August 2012	Applied as of January 2021	NA
Subject of regulations	US listed companies	Companies importing minerals into the EU	NA
Minerals covered	Conflict minerals (3TG): Refers to the following 4 minerals (without regard to its origin) Tantalum, Tin, Tungsten, Gold		Cobalt Mica (Natural Mica)
Risks covered	Source of funds for armed groups	OECD Annex II Risks #2	OECD Annex II Risks
Regions covered	Democratic Republic of the Congo (DRC) and the nine adjoining countries	CAHRAs (Conflict-Affected and High-Risk Areas)	CAHRAs (Conflict-Affected and High-Risk Areas)

## 2. Background of survey and supply chains

## 2.1 Cobalt: Risks

### Cobalt

**Primary use:** Batteries, automobiles, metallic alloys, magnets, paints, etc. Especially demands for lithium-ion batteries used in PCs, smart phones, EVs, etc. is expected to continue to grow, and cobalt will attract attention as needs for cobalt used in such batteries will also grow.

**Principal country of origin:** The Democratic Republic of the Congo (DRC)  
(At least 70% of global production, and at least 50% of the world's cobalt reserves)

**Issues of concern:** Child labor and unsafe working conditions at mining sites

Please visit **RMI's Material Insights** for details

Material Insights: <https://www.material-insights.org/material/cobalt/>

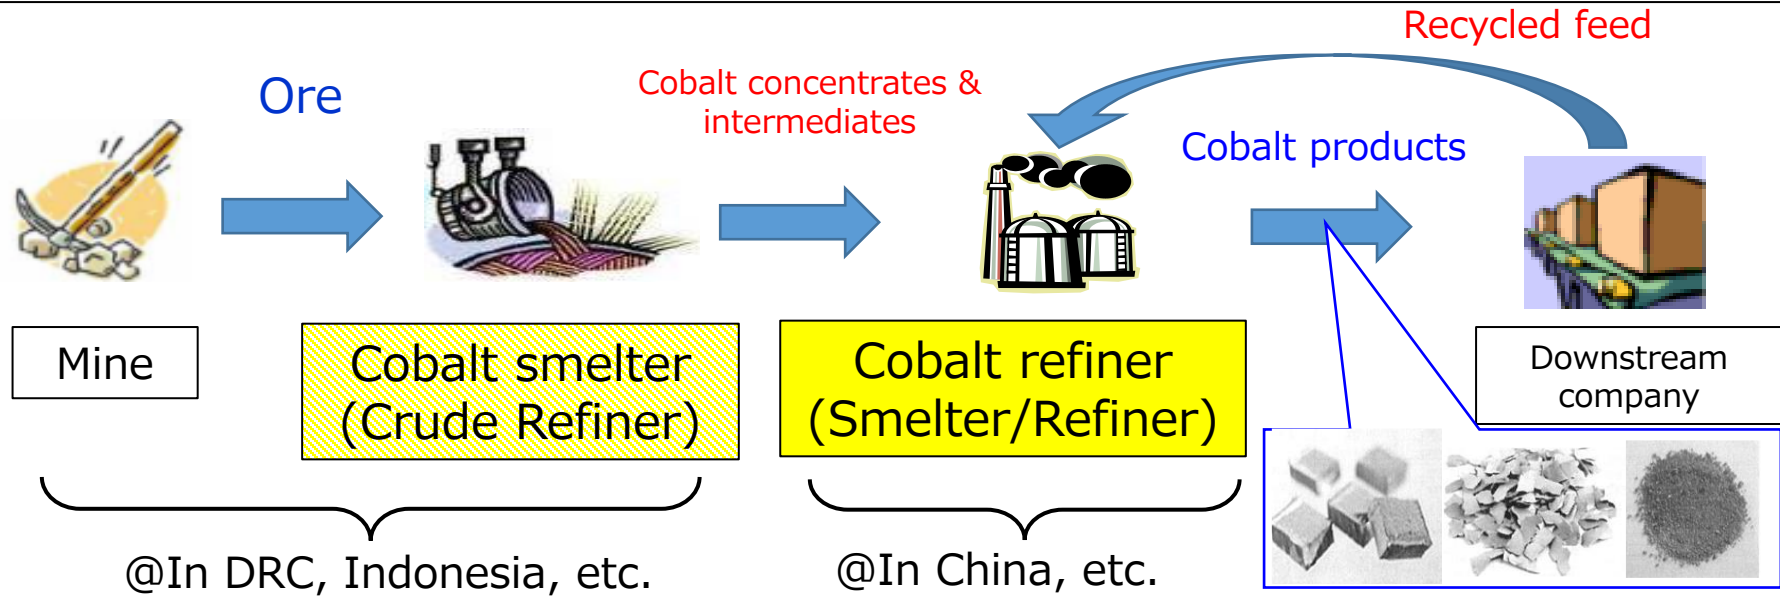

# 2.1 Cobalt: Supply chain

## Cobalt

A cobalt smelter/refiner is defined as an entity that processes cobalt concentrates, intermediates, or recycled feed and produces cobalt products for direct use in a downstream manufacturing process. **Downstream manufactures need to conduct surveys right back up their supply chains, going as far back as to the smelters/refiners.**

Crude refiners close to mines that refine metals from ore have recently begun receiving RMAP\* assessments, and are beginning to appear on the Conformant and Active Smelter list. (The cobalt industry and RMI use "Smelter" and "Refiner" interchangeably)

- ◆ Cobalt intermediates: Partially refined hydroxides, carbonates, metals, etc.
- ◆ Recycled feed: Industrial scrap and scrap from consumer goods scrap, etc.
- ◆ Cobalt products: Electrical cobalt, cobalt sulfate, cobalt briquettes, cobalt powder, etc.

\* RMAP is RMI's Responsible Minerals Assurance Process

## 2.1 Cobalt: SSN status

### Cobalt

Number of smelters recognized as **S**andard **S**melter **N**ames by RMI and their conformant status (Does not cover all smelters in the world)

#### Comparison of the status as of June 2022 and **May 2023**

( ) number of Crude Refiners

#### SSN Total

91(8)

→ **84(11)**

#### Conformant (Certified)

31(3) → **37(4)**

**Conformant ratio 44%**

#### Active (Scheduled for assessment)

12(2) → **11(2)**

Assessments are running behind schedule due to the COVID-19 pandemic.

For current information about conformant status, please check the following:

<https://www.responsiblemineralsinitiative.org/cobalt-refiners-list/>

## 2.2 Mica: Risks

### Mica

**Primary use:** Electrical Insulators in electrical products, insulating materials, paints etc.

**Principal country of origin:** China(produces approx. 30% of global production), Finland, US, India, Madagascar

**Issues of concern:** Child labor and unsafe working conditions at mining sites of India and Madagascar that together produces approx. 12% of global production

Please visit **RMI's Material Insights** for details

Material Insights: <https://www.material-insights.org/material/mica/>

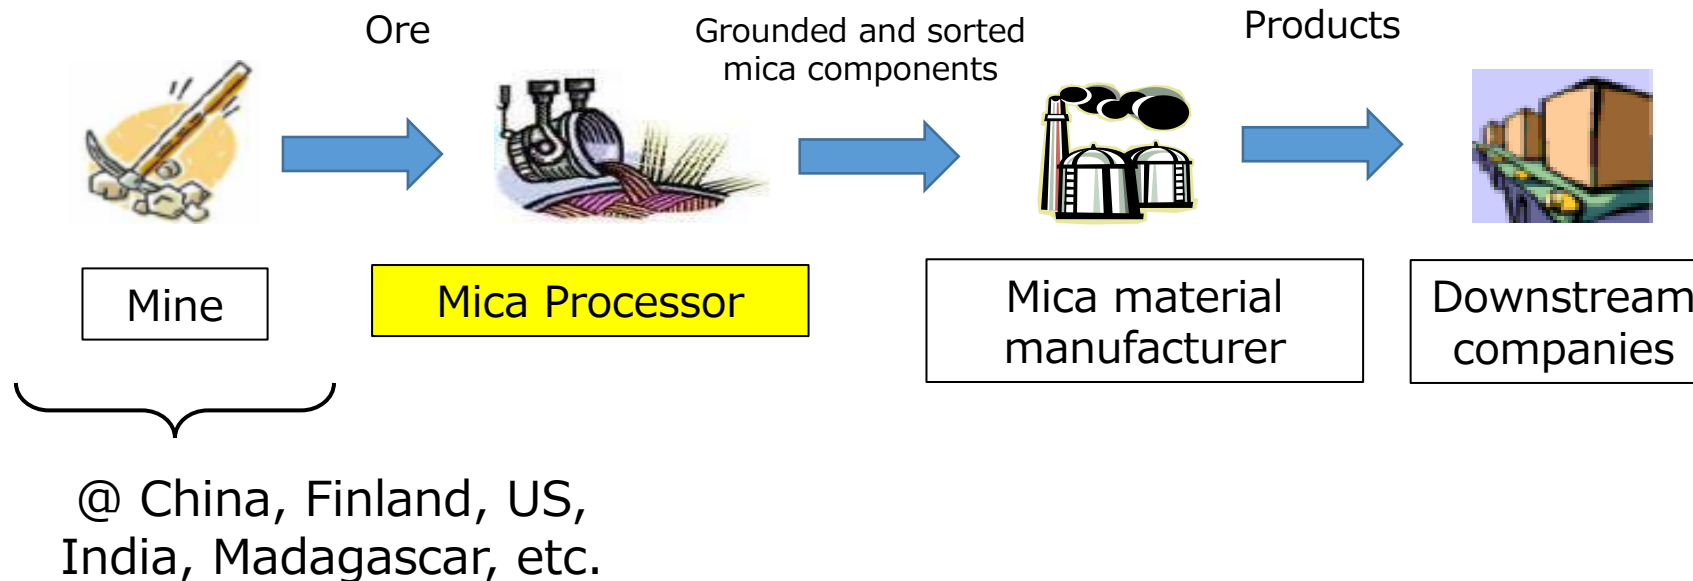

## 2.2 Mica: Supply Chain

### Mica

Mica consists of 2 types: natural mica and synthetic mica. Only information on natural mica is required in the EMRT.

Mica processors separate ores including mica taken from mines into non-mica components and mica components by various physical or mechanical methods.

**Downstream companies are required to identify the processors.**

## 2.2 Mica: SSN Status

### Mica

Number of smelters recognized as **Sandard Smelter Names** (in the case of Mica, Processors) ※ by RMI (Does not cover all smelters in the world)

※ “Kakogyousha” described in the EMRT is equivalent to processors.

### Comparison of the status as of June 2022 and **May 2023**

**SSN Total**  
22 → **25**

**Conformant (Certified) 0 → 0**  
**Conformant ratio 0%**

**Active (Scheduled for assessment)**  
3 → **4**

Assessments are running behind schedule due to the COVID-19 pandemic.  
For current information about conformant status, please check the following:

<https://www.responsiblemineralsinitiative.org/mica-processors-list/>

# 3. OECD Annex II Risk

# 3. OECD Annex II Risks

## OECD Annex II Risks:

Those risks defined in Annex II of the “**Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas**” #1 issued by OECD

### OECD Annex II Risk:

1. Serious **abuses** associated with the extraction, transport or trade of minerals (child labor, etc.)
2. Direct or indirect support to **non-state armed groups**
3. **Illegal acts** by public or private security forces (protection money)
4. **Bribery** and fraudulent representation of the origin of minerals
5. **Money laundering**
6. Payment of taxes, fees and royalties due to governments (**tax evasion**)

#1 Available for download from MOFA website (Version 3, provisional translation)

<https://www.mofa.go.jp/mofaj/gaiko/csr/housin.html>

Please be aware that, on OECD website, the English (official) edition is updated to the current version 3, but the Japanese translation is still of version 1 (as of **May 10, 2023**)

# 4. Conflict-Affected and High-Risk Areas (CAHRAs)

# 4.1 Definition of CAHRAs in OECD

## OECD's definition of CAHRAs<sup>#1</sup>

Conflict-affected and high-risk areas are identified by the presence of armed conflict, widespread violence or other risks of harm to people.

Armed conflict may take a variety of forms, such as a conflict of international or non-international character, which may involve two or more states, or may consist of wars of liberation, or insurgencies, civil wars, etc.

High-risk areas may include areas of political instability or repression, institutional weakness, insecurity, collapse of civil infrastructure and widespread violence. Such areas are often characterized by widespread human rights abuses and violations of national or international law.

**#1 CAHRAs: Conflict-Affected and High-Risk Areas**

## 4.2 CAHRAs in the EU Regulations

EU definition of CAHRAs are countries/areas that are

- (1) in a state of armed conflict, fragile post-conflict areas; or
- (2) witnessing weak or non-existing governance and security, such as failed states, and widespread and systematic violations of international law, including human rights abuses

The 1<sup>st</sup> version of the CAHRAs list was released on Dec. 17. 2020

<https://www.cahraslist.net/cahras>

Release of subsequent revised lists. In the Dec. 2022 ver. list, Mexico was removed.

CAHRAs' designated countries/areas (Mar. 2023 ver.): 28 countries, 291 areas

Democratic Republic of Congo, Central African Republic, Burundi, South Sudan, Afghanistan, Yemen, India, Ukraine, Egypt, Ethiopia, Eritrea, Cameroon, Colombia, Zimbabwe, Sudan, Somalia, Chad, Turkey, Nigeria, Niger, Pakistan, Philippines, Burkina Faso, Venezuela, Mali, Myanmar, Mozambique, Libya  
(countries or areas of the above)

## 4.3 Definition in the EMRT

### EMRT's definition of CAHRAs

RMI defines CAHRAs as countries/areas identified by each company, taking into consideration CAHRAs definition in OECD, the EU Conflict Minerals Regulation, etc. Please refer to the following website when identifying CAHRAs.

- ◆ Conflict Affected and High-Risk Areas (CAHRAs) (RMI)

Indicates procedure guidance and information sources to identify CAHRAs  
<http://www.responsiblemineralsinitiative.org/minerals-due-diligence/risk-management/conflict-affected-and-high-risk-areas/>

- ◆ Guidelines for the identification of CAHRAs and other supply chain risks under Regulation (EU) 2017/821 of the European Parliament and of the Council based on the EU Conflict Minerals Regulation (issued Aug. 10. 2018)

<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32018H1149>

# 5 . EMRT Rev. 1.2 Outline and Changes

# 5. EMRT Rev. 1.2 Outline: Structure

## The EMRT comprises an Excel file with 8 sheets

Instruction, Revision, Definitions, Declaration, Smelter List, Checker, Product List, Smelter Look-up  
(The role of each sheet will be explained on the next page)

You need to fill in THREE sheets: **Declaration, Smelter List, and Product List**

**Extended Mineral Reporting Template (EMRT)**

Select Language Preference Here:

Language choices are restricted to English, Japanese, Chinese, Korean and French

Confirm revision no.

Revision 1.2  
May 12, 2023  
[Link to Terms & Conditions](#)

The purpose of this document is to collect sourcing information on cobalt or natural mica.

Mandatory fields are noted with an asterisk (\*). Consult the instructions tab for guidance on how to answer each question.

**Company Information**

Company Name (*):	
Declaration Scope or Class (*):	
Description of Scope:	
Company Unique ID:	
Company Unique ID Authority:	
Address:

Instructions | Revision | Definitions | **Declaration** | Smelter List | Checker | Product List | Smelter Look-up

# 5. EMRT Rev. 1.2 Outline: Role of Each Sheet

Instructions | Revision | Definitions | Declaration | Smelter List | **Checker** | Product List | Smelter Look-up

## Role of each sheet

- Instruction: Explanation on background and how to fill in the sheet
- Revision: Record of revisions
- Definitions: Definitions of terminology
- **Declaration**: Company Information (Q1-7 and A-G <REQUIRED>
- **Smelter List**: List of smelters (refiners) <WHERE NECESSARY#1>
- **Checker**: Checks whether all necessary information has been filled in <CHECK REQUIRED#2 >
- **Product List**: List of target products < WHERE NECESSARY#3 >
- Smelter Look-up: List of smelters (refiners)#4  
(List of smelters (refiners) at the time of EMRT issuance)

### Notes:

#1 Fill in for **minerals** to which you responded “Yes” in Q2 of “Declaration”

#2 Fill in any areas **marked in red** on the Checker Sheet

#3 Fill in where the scope is “**B: Product**”

#4 This is a list of smelters at the time of EMRT issuance.

The latest list can be found on the RMI website.

※ Please read “Instructions” and “Definitions” before filling in the form.

# 5. EMRT Rev.1.2 (2023 version): Changes

## ■ EMRT (Extended Minerals Reporting Template) :

Oct. 20, 2021: Release of 1<sup>st</sup> version (Rev1.0)

May 12, 2023: Release of Revision (Rev.1.2)

Bug fix & update of Smelters' information in the Smelter Look-up Sheet of Rev.1.11

**No revisions having impact on the practice of survey was made**

★ Timing of release: Up to 2022, release was made in autumn. From 2023, release is made concurrently with the release of CMRT

EMRT entry guide (English version & Japanese version) is available on RMI's website

(E)[https://www.responsiblemineralsinitiative.org/media/docs/EMRT%201.0%20Completion%20Guide\\_Jun012022.pdf](https://www.responsiblemineralsinitiative.org/media/docs/EMRT%201.0%20Completion%20Guide_Jun012022.pdf)

(J)[https://www.responsiblemineralsinitiative.org/media/docs/EMRT%201.0%20Completion%20Guide\\_Jun012022\\_JPN.pdf](https://www.responsiblemineralsinitiative.org/media/docs/EMRT%201.0%20Completion%20Guide_Jun012022_JPN.pdf)

Covered Minerals: Cobalt/Natural Mica \*

• "Not applicable for this declaration" was added to the answer options of Q1, and it became possible to answer only for either cobalt or natural mica (necessary to confirm covered minerals beforehand with customers)

\*There are 2 types of mica, natural mica and synthetic mica. Synthetic mica is not covered by this survey.

Natural mica: A mineral that is mined or naturally occurring, such as muscovite and phlogopite.

Synthetic mica (Fluorophlogopite): A man-made material composed of such materials as magnesium, aluminum, and silicon

# 6. How to complete the EMRT

# 6.1 How to Complete the EMRT: Declaration Sheet - Composition -

The image shows a screenshot of the 'Extended Mineral Reporting Template (EMRT)' Declaration Sheet. The document is divided into three main sections, each highlighted with a red border and a circled letter:

- Section A:** 'Company Information'. This section contains a table for providing details about the reporting entity, including company name, description of the report, contact information, and employee details. It is marked with a circled 'A'.
- Section B:** 'Questions related to your company's cobalt/natural mica use'. This section contains 7 questions regarding the use of cobalt and natural mica in products and supply chains. It is marked with a circled 'B'.
- Section C:** 'Questions related to your Responsible Sourcing Procurement policies and actions'. This section contains 7 questions regarding the company's policies and actions for responsible sourcing. It is marked with a circled 'C'.

The Declaration Sheet is composed of three blocks

- Ⓐ Questions related to your company's **company information** (14 questions)
- Ⓑ Questions related to the status of your **cobalt/natural mica use** (summary of primary supplier information) (7 questions)
- Ⓒ Questions related to your **Responsible Sourcing Procurement policies and actions** (7 questions)

# 6.1 How to Complete the EMRT: Declaration Sheet Ⓐ Company Information

All items marked with an asterisk (\*) must be completed (highlighted in yellow)

Use the pulldown menu to choose from options A to C. The party making the report (your company) usually decides the "Description of Scope", but in some cases it is decided by the customer.

Note: If you intend to send the Supplier's Declaration Sheet to your client company, you must take proactive measures (such as obtaining the supplier's permission) because sharing contact information of individuals stated in the Sheet may violate Private Information Protection Law in countries that have such law.

DD-MMM-YYYY format  
Example: 01-May-2023

Company Information	
Company Name (*):	
Declaration Scope or Class (*):	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #ffff00; padding: 2px;">A. Company</div> <div style="background-color: #cccccc; padding: 2px;">B. Product (or List of Products)</div> <div style="padding: 2px;">C. User defined [Specify in 'Description of scope']</div> </div>

# 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

Answer each question using the **pulldown menu**. If you answered **“No”** or **“Not applicable for this declaration”** to Q1, you don't need to respond from Q2 onward.

Answer the following questions 1 - 7 based on the declaration scope indicated above		
1) Is any of the cobalt or natural mica intentionally added or used in the product(s) or in the production process? (*)	Answer	Comments
Cobalt(*)		
Mica(*)		
2) Does any cobalt or natural mica remain in the product(s)? (*)	Answer	Comments
Cobalt(*)		
Mica(*)		
3) Do any of the smelters or processors in your supply chain source the cobalt or natural mica from conflict-affected and high-risk areas? (OECD Due Diligence Guidance, see definitions tab) (*)	Answer	Comments
Cobalt(*)		
Mica(*)		
4) Does 100 percent of the cobalt originate from recycled or scrap sources? (*)	Answer	Comments
Cobalt(*)		
5) What percentage of relevant suppliers have provided a response to your supply chain survey? (*)	Answer	Comments
Cobalt(*)		
Mica(*)		
6) Have you identified all of the smelters or processors supplying the cobalt or natural mica to your supply chain? (*)	Answer	Comments
Cobalt(*)		
Mica(*)		
7) Has all applicable smelter or processor information received by your company been reported in this declaration? (*)	Answer	Comments
Cobalt(*)		
Mica(*)		

- 1) Is any of the cobalt or natural mica intentionally added or used in the product(s) or in the production process? (\*)
- 2) Does any cobalt or natural mica remain in the product(s)?
- 3) Do any of the smelters or processors in your supply chain source the cobalt or natural mica from conflict-affected and high-risk areas?
- 4) Does 100 percent of the cobalt originate from recycled or scrap sources?
- 5) What percentage of relevant suppliers have provided a response to your supply chain survey?
- 6) Have you identified all of the smelters or processors supplying the cobalt or natural mica to your supply chain?
- 7) Has all applicable smelter or processor information received by your company been reported in this declaration?

# 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

1) Is any of the cobalt or natural mica intentionally added or used in the product(s) or in the production process?

1) Is any of the cobalt or natural mica intentionally added or used in the product(s) or in the production process? (\*)

	Answer
Cobalt(*)	
Mica(*)	

Answer for each mineral

**Yes:** Answer "Yes" if cobalt or natural mica has been intentionally added or used because it is necessary to the functionality, specifications, or production of a product

**No:** Answer "No" if cobalt or natural mica has not been intentionally added or used, even if products include trace-level cobalt contaminants

**Unknown:** If you don't know whether cobalt or natural mica has been intentionally added or used, answer "Unknown"

**Not applicable for this declaration:** Select only if the use of cobalt or natural mica is not in scope of the declaration

(Necessary to confirm the covered minerals beforehand with customers, etc.)

1. If even one of the EMRTs you have collected from suppliers answers "Yes", your answer here must also be "Yes."
2. If all of the EMRTs you have collected from suppliers answer "No", your answer will be "No."
3. In cases other than the above, answer "Unknown."
4. If the use of cobalt or mica is not in scope of this declaration select "Not applicable for this declaration"

If you answered "Yes" to Q1, you are required to answer from Q2 onward.

# 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

2) Does any cobalt or natural mica remain in the product(s)?

2) Does any cobalt or natural mica remain in the product(s)? (*)		Answer
	Cobalt(*)	
	Mica(*)	

Answer for each mineral

**Yes:** If cobalt or natural mica remains in the product

**No:** If cobalt or natural mica does not remain in the product

**Unknown:** If you don't know whether cobalt or natural remains in the product

1. If even one of the suppliers from which you have received an EMRT answers "Yes, your answer here must also be "Yes."
2. If you answered "Yes", you must fill in the Smelter List Sheet.
3. If you answer "No" or "Unknown" no further answers are necessary from Q3 onward (option grayed out).

If cobalt or natural mica is added because it is necessary to the specifications or functionality, it will obviously remain in the product, so you should answer "Yes".

If cobalt or natural mica used in the production process remain in the product, the answer should be "Yes"

If you answered "Yes" to Q2, you **must also answer** Questions 3-7 and A-G.

# 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

3 ) Do any of the smelters in your supply chain source the cobalt or natural mica from a Conflict-Affected or High-Risk Area?

3) Do any of the smelters or processors in your supply chain source the cobalt or natural mica from conflict-affected and high-risk areas? (OECD Due Diligence Guidance, see definitions tab) (\*)

		Answer
	Cobalt(*)	
	Mica(*)	

Answer for each mineral (Note: options are different for cobalt and mica)

## Answer for Cobalt

Conflict-Affected or High-Risk Area:  
CAHRAs

**Yes:** If any of the smelters in your supply chain sources from a CAHRA (describe in Comments field)

**No:** If none of the smelters in your supply chain sources from a CAHRA

**Unknown:** If it is unclear whether smelters in your supply chain source from a CAHRA

**DRC only:** If your smelters source only from the DRC

※ If **even one of the suppliers** from which you have received an EMRT answers “**Yes**”, your answer here must also be “**Yes**”. If not all smelters are identifiable, that is, if your answer in Question 6 is “**No**”, than your answer here must be “**Unknown**”

If there is a broad range of answers in the EMRTs you have collected, use the Comments field as shown on the right.

収集したEMRTの組合せケース				貴社EMRT回答(コバルト)	
Yes	No	Unknown	DRC only	Answer	Comments

	<input type="radio"/>		<input type="radio"/>	DRC only	
		<input type="radio"/>	<input type="radio"/>	DRC only	including unknown
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	DRC only	including unknown

Comments: if comments “including DRC” or “including unknown” is stated in answers of any collected EMRT, please write such comments in the Comments field of your EMRT.

# 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

3 ) Do any of the smelters or processors in your supply chain source the cobalt or natural mica from a Conflict-Affected or High-Risk Area?

3) Do any of the smelters or processors in your supply chain source the cobalt or natural mica from conflict-affected and high-risk areas? (OECD Due Diligence Guidance, see definitions tab) (\*)

	Cobalt(*)	
	Mica(*)	

Answer

Answer for each mineral (Note: options are different for cobalt and mica)

## Answer for Mica

Conflict-Affected or High-Risk Area: CAHRAs

**Yes:** If any of the smelters in your supply chain sources from a CAHRA (describe in Comments field)

**No:** If none of the smelters in your supply chain sources from a CAHRA

**Unknown:** If it is unclear whether smelters in your supply chain source from a CAHRA

**India and/or Madagascar only:** If your smelters source only from India and/or Madagascar

※ If **even one of the suppliers** from which you have received an EMRT answers **"Yes"**, your answer here must also be **"Yes"**. If not all smelters are identifiable, that is, if your answer in Question 6 is **"No"**, then your answer here must be **"Unknown"**

If there is a broad range of answers in the EMRTs you have collected, use the Comments field as shown on the right

Comments: if comments "including India and/or Madagascar" or "including unknown" is stated in answers of any collected EMRT, please write such comments in the Comments fields of your EMRT.

Enter additional information in the Comments field

## 【Common to Cobalt and Mica】

If you answer “Yes” or “DRC Only”, you must substantiate this in the Comments field. For example, if you know the smelter name or CID number, this can be used to determine the smelter’s third-party certification status. If you also know the country of origin, an RCOI (Reasonable Country of Origin Inquiry) can be undertaken.

If you receive an EMRT with a “Yes” or “DRC Only” answer to Question 3 with no substantiation in the Comments field, please ask for specific information to be added.

## 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

4) Does 100 percent of the cobalt originate from recycled or scrap sources?

4) Does 100 percent of the cobalt originate from recycled or scrap sources? (\*)

Answer

Cobalt(\*)

This question is for cobalt only

**Yes:** If 100% of the cobalt comes from recycled or scrap sources

**No:** Some of the cobalt comes from natural (mined) resources

**Unknown:** Unclear whether 100% of the cobalt comes from recycled or scrap sources

If all of the suppliers from which you have received an EMRT answer "Yes," your answer will be "Yes". If even one answers "No", your answer here must also be "No".

## 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

### 5) What percentage of relevant suppliers have provided a response to your supply chain survey?

5) What percentage of relevant suppliers have provided a response to your supply chain survey?(\*)

	Answer
Cobalt(*)	
Mica(*)	

Answer for each mineral

Choose one of the following options according to the **percentage of answers received from suppliers subject to the survey**.

- 100%: Receive answer from all suppliers
- Greater than 90%: Receive answer from more than 90% of suppliers
- Greater than 75%: Receive answer from more than 75% of suppliers
- Greater than 50%: Receive answer from more than 50% of suppliers
- 50% or less: Receive answer from 50% or less of suppliers
- None: Receives no answer from suppliers

※ Unrelated to the contents of the answer to Question 5 received from suppliers

Rate of answers received in your supplier survey = Number of answers received/Numbers of requests made

Suppliers excluded from the scope of this survey:

- Suppliers of equipment, tools, consumables, and other products outside the scope of this survey
- Suppliers or parts and materials which clearly do not contain cobalt/natural mica

Note: **Surveys must be continued until the response rate is 100%.**

## 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

6) Have you identified all of the smelters or processors supplying the cobalt or natural mica to your supply chain? (\*)

6) Have you identified all of the smelters or processors supplying the cobalt or natural mica to your supply chain?(\*)

	Answer
Cobalt(*)	
Mica(*)	

Answer for each mineral

**Yes:** If you have identified all of these smelters/processors

**No:** If you have not identified even one of the smelters/processors supplying the cobalt/natural mica to your supply chain

**Unknown:** If you don't know whether you have identified all such smelters/processors

You can only answer "Yes" if you **meet all four of the conditions below:**

- ① You have received EMRTs from all the relevant suppliers  
(=**your answer to Q5** was **100%**)
- ② The answer to **Q5** in all the EMRTs you received was **100%**
- ③ The answer to **Q6** in all the EMRTs you received was "Yes"
- ④ The answer to **Q7** in all the EMRTs you received was "Yes"

There are cases where all smelters were identified through the result of due diligence

## 6.1 How to Complete the EMRT: Declaration Sheet ② Cobalt/Mica Use Status

7) Has all applicable smelter or processor information received by your company been reported in this declaration?

7) Has all applicable smelter or processor information received by your company been reported in this declaration?(\*)

		Answer
	Cobalt(*)	
	Mica(*)	

Answer for each mineral

**Yes:** You have reported all applicable smelter/processor information received by your company

**No:** You have not reported some of the applicable smelter/processor information received by your company

**Unknown:** You don't know (You should not need to select this option.)

The answer will usually be "Yes," but it may be "No" if you have not reported all applicable information due to reasons such as your confidentiality obligation to a supplier.

# 6.1 How to Complete the EMRT: Declaration © Policies and Actions

Choose the pull-down to answer each of the 7 questions on your company’s policies and actions in relation to responsible minerals sourcing.

Question	Answer
A. Have you established a responsible minerals sourcing policy? (*)	<input type="text"/>
B. Is your responsible minerals sourcing policy publicly available on your website? (Note – If yes, the user shall specify the URL in the comment field.) (*)	<input type="text"/>
C. Do you require your direct suppliers to source cobalt from smelters or natural mica from processors whose due diligence practices have been validated by an independent third-party audit program? (*)	<input type="text"/>
	Cobalt (*) <input type="text"/>
	Mica (*) <input type="text"/>
D. Have you implemented due diligence measures for responsible sourcing? (*)	<input type="text"/>
E. Does your company conduct cobalt and/or natural mica supply chain survey(s) of your relevant supplier(s)? (*)	<input type="text"/>
F. Do you review due diligence information received from your suppliers against your company's expectations? (*)	<input type="text"/>
G. Does your review process include corrective action management? (*)	<input type="text"/>

- A. Have you established a responsible minerals sourcing policy?
- B. Is your responsible minerals sourcing policy publicly available on your website? (Note: If “Yes”, user shall specify the URL)
- C. Do you require your direct suppliers to source the cobalt from smelters or natural mica from processors whose due diligence practices have been validated by an independent third-party audit program?
- D. Have you implemented due diligence measures for responsible sourcing?
- E. Does your company conduct cobalt and/or natural mica survey(s) of your relevant supplier(s)? (\*)
- F. Do you review due diligence information received from your suppliers against your company's expectations?
- G. Does your review process include corrective action management?

Unrelated to the contents of EMRTs received from suppliers

If any of your answers to QA-G is limited to cobalt or mica, indicate the minerals to which it is related in the Comments field (e.g. “only implemented for cobalt”, “only implemented for mica”)

A. Have you established a responsible minerals sourcing policy?

**Yes:** If your company has established such a policy

**No:** If your company has NOT established such a policy

---

B. Is your responsible minerals sourcing policy publicly available on your website?

(Note – If “**Yes**”, the user shall specify the URL in the Comments field)

**Yes:** If your responsible minerals sourcing policy is publicly available on your website

**No:** If you have no website or your responsible minerals sourcing policy is NOT publicly available on your website

## 6.1 How to Complete the EMRT: Declaration Sheet © Policies and Actions

C. Do you require your direct suppliers to source the cobalt from smelters or natural mica from processors whose due diligence practices have been validated by an independent third-party audit program?

	Cobalt(*)	
	Mica(*)	

Answer for each mineral  
(Note: options are different for cobalt and mica)

### Answer for Cobalt

- Yes:** If, in the form of your company's policies, a written sourcing request, or an e-mail request, etc., you require your direct suppliers to source from smelters whose due diligence practices have been validated by RMI or an independent third-party audit program \*
- No:** If you do not require this from, or clearly indicate this to, your direct (primary) suppliers

\*Independent third-party audit programs include the following:  
London Bullion Market Association (LBMA), Responsible Jewellery Council (RJC)

Some customers press for "all smelters in the supply chain to be RMAP conformant" and strongly urge for "any smelters that fail to do so to be removed from the supply chain".  
If EMRTs you receive from suppliers note non-RMAP conformant smelters, we recommend going through the supply chain to notify these smelters of the above and urge them to acquire RMAP conformant status.

## 6.1 How to Complete the EMRT: Declaration Sheet © Policies and Actions

C. Do you require your direct suppliers to source the cobalt from smelters or natural mica from processors whose due diligence practices have been validated by an independent third-party audit program?

	Cobalt(*)	
	Mica(*)	

Answer for each mineral  
(Note: options are different for cobalt and mica)

### Answer for Mica

**Yes:** If, in the form of your company's policies, a written sourcing request, or an e-mail request, etc., you require your direct suppliers to source from smelters whose due diligence practices have been validated by RMI or an independent third-party audit program\*

**No:** If you do not require this from, or clearly indicate this to, your direct (primary) suppliers

**Yes, when more processors are validated:** If you plan to require this from your suppliers when more processors are validated.

\*Independent third-party audit programs include the following: London Bullion Market Association (LBMA), Responsible Jewellery Council (RJC)

As mica processors that are RMAP conformant was 0 (as of June 2023), it is difficult to source from processors that are validated at present. If you plan to require your direct suppliers to source from validated natural mica processors when more processors are validated, select "**Yes, when more processors are validated**".

D. Have you implemented due diligence measures for responsible sourcing?

**Yes:** If you have implemented due diligence measures such as the examples below

**No:** If you have not implemented due diligence measures

### Examples of measures:

- Highlighting and assessing risks from EMRTs received from suppliers  
⇒ e.g. Ranking the rates of receipt of EMRTs and the precision of smelter list information, etc.
- Creating and implementing strategies for dealing with identified risks  
⇒ e.g. Determining and implementing action rules based on the status of responses to Questions A-G.
- Prior written confirmation and agreement with suppliers on actions that will be taken when a connection with forced labor is identified.

※ Due diligence = Risk assessment

Activities to make the supply chain transparent, check for any risks such as human right abuse in the origin of raw material, and **correct any problems that are found.**

E. Does your company conduct cobalt and/or natural mica survey(s) of your relevant supplier(s)?(\*)

**Yes, in conformance with IPC1755 (e.g. EMRT):** If you conduct conflict minerals surveys of your relevant suppliers using **the EMRT format**.

**Yes, Using Other Format (Describe):** If you conduct conflict minerals surveys of your relevant suppliers in **a format other than the EMRT** (describe such format in the Comments field)

**No:** If you do not collect due diligence information regarding cobalt and/or natural mica from your suppliers

\* IPC-1755: A standard establishing the requirements for exchanging data between suppliers and their customers in regard to the responsible sourcing of minerals, and establishing the requirements of the 3TG, cobalt and mica survey.

F. Do you review due diligence information received from your suppliers against your company's expectations?

**Yes:** If you have a process for reviewing EMRTs (due diligence information) received from suppliers

**No:** If you do not review EMRTs (due diligence information) received from suppliers

Review process examples:

- Review the accuracy and completeness of EMRT information received from Supplier
- Review whether suppliers have a responsible minerals sourcing policy, or review their actions based on their responses to Questions C-G
- Assess the certification status of smelters on the Smelter List

### ✓ Point

**It is important not just to collect supplier responses but to check the content of the responses received.** If you think there are any risks, you should go back up the supply chain or use the Internet to check this.

### G. Does your review process include corrective action management?

**Yes:** If you have the kind of corrective action management process noted below

**No:** If you don't have a corrective action management process

#### Examples of corrective action management:

- If a supplier does not have a responsible minerals sourcing policy, encourage them to develop one
- If a smelter on the Smelter List is not RMAP-conformant, go up the supply chain to encourage them to ask for a RMAP audit
- If a supplier scores poorly in your EMRT review process as noted in Question F, ask the supplier to address those issues

## 6.2 How to Complete the EMRT: Smelter List Sheet – Structure -

On the Smelter List, you enter information on all smelters in your supply chain. The sheet comprises 17 items.

The screenshot shows the top portion of the EMRT Smelter List Sheet. It includes a header with instructions for three options (A, B, and C) for entering smelter information, a logo for Responsible Minerals Initiative, a link to the RMAP Conformant Smelter List, and a version number (Version 1.2, May 12, 2023). Below this is a table with 17 columns, each numbered in red. The columns are: 1. Smelter Identification Number (Color), 2. Metal (\*), 3. Smelter Look-Up (\*), 4. Smelter Name (1), 5. Smelter Country (\*), 6. Smelter Identification Number, 7. Source of Smelter Identification Number, 8. Smelter Street, 9. Smelter City, 10. Smelter Facility Location: State / Province, 11. Smelter Contact Name, 12. Smelter Contact Email, 13. Proposed next steps, 14. Name of Mine(s) or if recycled or scrap sourced, enter "recycled" or "scrap", 15. Location (Country) of Mine(s) or if recycled or scrap sourced, enter "recycled" or "scrap", 16. Does 100% of the smelter's feedstock originate recycled or scrap sources?, and 17. Comments.

1. Smelter Identification Number Input Field
2. Metal (\*)
3. Smelter Look-Up (\*)
4. Smelter Name (1)
5. Smelter Country (\*)
6. Smelter Identification Number
7. Source of Smelter Identification Number
8. Smelter Street
9. Smelter City

10. Smelter Facility Location: State / Province
11. Smelter Contact Name
12. Smelter Contact Email
13. Proposed next steps
14. Name of Mine(s) or if recycled or scrap sourced, enter "recycled" or "scrap"
15. Location (Country) of Mine(s) or if recycled or scrap sourced, enter "recycled" or "scrap"
16. Does 100% of the smelter's feedstock originate from recycled or scrap sources?
17. Comments

(\*) :Compulsory fields

3. Smelter Look-Up: a function by which you can find the **S**tandard **S**melter **N**ame (SSN) from the Smelter Look Up sheet by entering the commonly recognized smelter name

Before filling in the Smelter List, please make the following preparations:

- ✓ List all the smelters that are listed in all EMRTs that you received
- ✓ Use CID numbers, etc., **to remove duplications** (name identification)
- ✓ If your list contains non-SSN smelters without CID numbers, check on their website, etc., to confirm whether **they really are operating smelters** (due diligence)
- ✓ Delete trading companies and other businesses which are clearly not smelters

In some cases, smelters that were SSNs may have become non-SSNs. For example, they may have:

- Ceased to operate as a smelter
- Amalgamated with another smelter
- Been discovered not to be a smelter

The SSNs listed on the Smelter Look-up Sheet are SSNs **at the time of EMRT issuance**, and there are some cases where RMI has subsequently recognized a smelter as an SSN and given it a CID number (you can check this on the RMI website). Even in these cases, for the purposes of this EMRT, the smelter will be deemed “Smelter not listed”.

## 6.2 How to Complete the EMRT: Smelter List Sheet – Data Entry –

### ① If you already know the CID number

When you enter the CID number into Field A, Fields B, C, E, F, G, I, and J will be automatically populated.

We recommend copying and pasting CID numbers into Field A.

A	B	C	D	E	F	G	H	I	J
TO BEGIN: Option A: If you know the Smelter Identification Number, input the number in Column A (columns B, C, E, F, G, I and J will auto-populate); D will grey out. Option B: If you have a cobalt or natural mica and Smelter Look-up name combination, complete the following steps: Step 1. Select Metal in column B									
 © 2023 Responsible Minerals Initiative. All rights reserved.									
Smelter Identification Number Input	Metal (*)	Smelter Look-up (*)	Smelter Name (1)	Smelter Country (*)	Smelter Identification	Source of Smelter Identification Number	Smelter Street	Smelter City	Smelter Facility Location: State / Province
CID003226	Cobalt	Umicore Finland Oy		FINLAND	CID003226	RMI		Kokkola	Mellersta Österbotten

Enter the CID number in Field A

Fields B, C, E, F, G, I, and J will be populated automatically

## 6.2 How to Complete the EMRT: Smelter List Sheet – Data Entry –

### ② If you don't know the CID number

If you select **cobalt** or **mica** in **Field B** and chose **the appropriate smelter name** in **Field C**, Fields E, F, G, I, and J will be populated automatically.

You can copy and paste data into Fields B and C, but if the data in Field C does not exactly match the data in the Smelter Look-up field on the Smelter Look-up Sheet, Fields E, F, G, I, and J will not be populated automatically even if it is a SSN (such smelter has a CID number).

### ③ If there are no selection options in Field C (non-SSN smelter)

Once you have selected **cobalt** or **mica** in **Field B**, select “**Smelter not listed**” in **Field C**, and enter **the smelter name** in **Field D** and **the smelter country** in **Field E**. All these fields are compulsory, but please also enter data in Fields H-P to the best of your ability.

### ④ If there are any Smelters that the name or location is not identified

Select **Cobalt** or **Mica** in **Field B** and choose “**Smelter not yet identified**” in **Field C**.

TO BEGIN:

Option A: If you know the Smelter Identification Number, input the number in Column A (columns B, C, E, F, G, I and J will auto-populate); D will grey out.

Option B: If you have a cobalt or natural mica and Smelter Look-up name combination, complete the following steps:

© 2023 Responsible Minerals Initiative. All Rights Reserved.

Smelter Identification Number Input Column	Metal (*)	Smelter Look-up (*)	Smelter Name (1)	Smelter Country (*)	Smelter Identification Number	Source of Smelter Identification Number	Smelter Street	Smelter City	Smelter Facility Location: State / Province
②	Cobalt	Cosmo EcoChem Co., Ltd.		KOREA, REPUBLIC OF	CID003415	RMI		Ulsan	
③	Cobalt	Smelter not listed	ABCDEF	JAPAN		Enter smelter details			
④	Cobalt	Smelter not yet identified							

## 6.3 How to Complete the EMRT: Product List Sheet – Data Entry –

If your Declaration Scope or Class is “**B. Product (or List of Products)**”, you must complete the **Product List**.

 <b>Completion required only if reporting level "Product (or List of Products)" selected on the 'Declaration' worksheet.</b>		
<a href="#">Click here to return to Declaration tab</a>		
<b>Manufacturer's Product Number (*)</b>	<b>Manufacturer's Product Name</b>	<b>Comments</b>

Manufacturer's Product Number (**compulsory**): Enter the product numbers for your relevant products

Manufacturer's Product Name: Enter the product name for your relevant products

Comments: Enter comments where necessary

## 6.4 How to Complete the EMRT: Checker Sheet

After completing the Declaration Sheet, Smelter List Sheet, and Product List Sheet, please use the Checker Sheet to check that you **have populated all the necessary fields**.

To ensure all required fields have been populated before submitting to your customers review form for any line items highlighted in red

[Click here to return to Declaration tab](#)      [Click here to return to Smelter List](#)

Required Fields	Answer provided	Notes	Hyperlink to source
Company Name (*):	ABCDEFGF	Complete	
Declaration Scope or Class (*):	A. Company	Complete	
Description of Scope:		Complete	
Contact Name (*):		Provide contact name in Declaration tab cell D15	<a href="#">Click here to enter Contact Name</a>
Email - Contact (*):		Provide a valid email for contact in Declaration tab cell D16	<a href="#">Click here to enter Email-Contact</a>
Phone - Contact (*):	+81-1234-5678	Complete	

① Select Checker Sheet to confirm your data entry

② Areas in green are complete; areas in red are incomplete

③ When the "Required fields remaining to be completed" value is "0", your data entry is complete

Required fields remaining to be completed: 22
