# Promoting the Green IT Initiative in Japan

6 June 2013

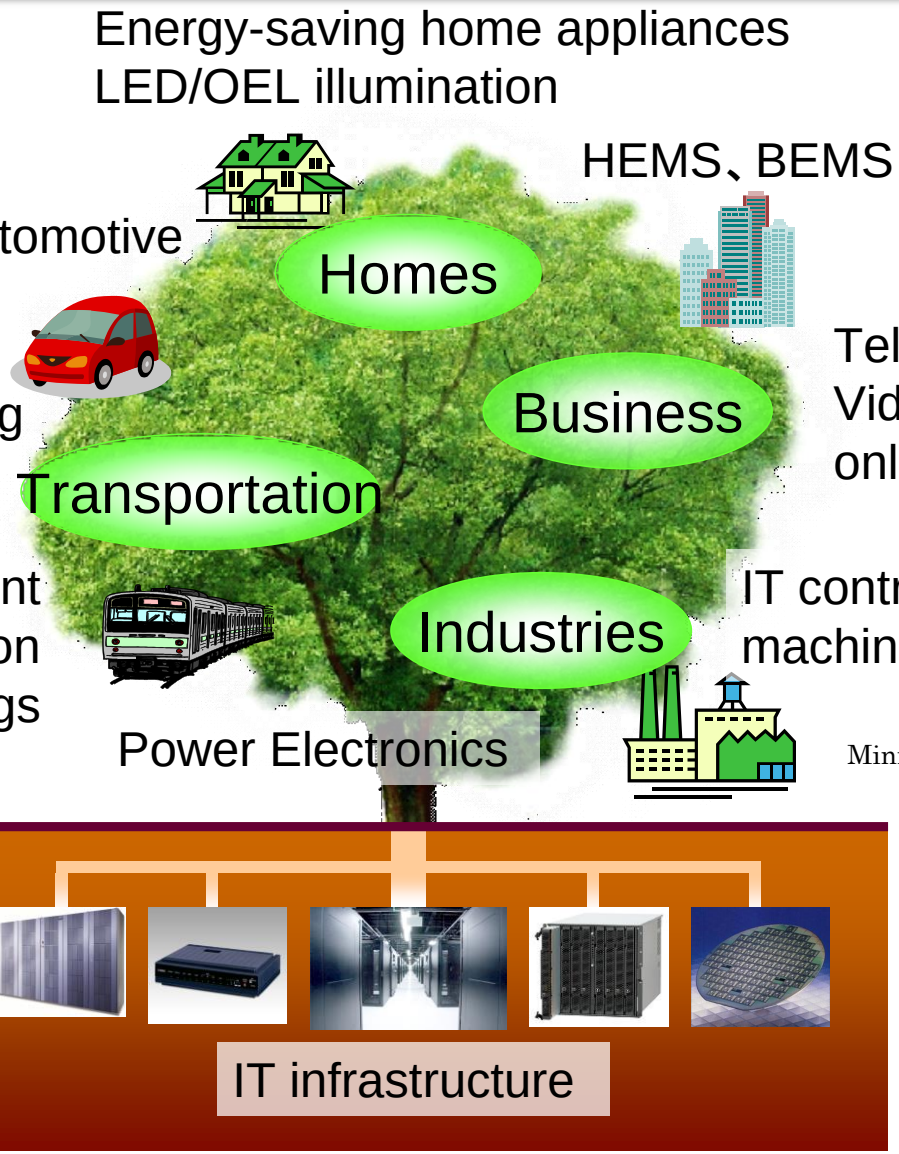
Japan Electronics and Information Technology Industries Association(JEITA) /

Green IT Promotion Council

# 1. Introduction
## – The Significance of Green IT –

# Concept of Green IT

IT equipment in every field has great potential to help save energy

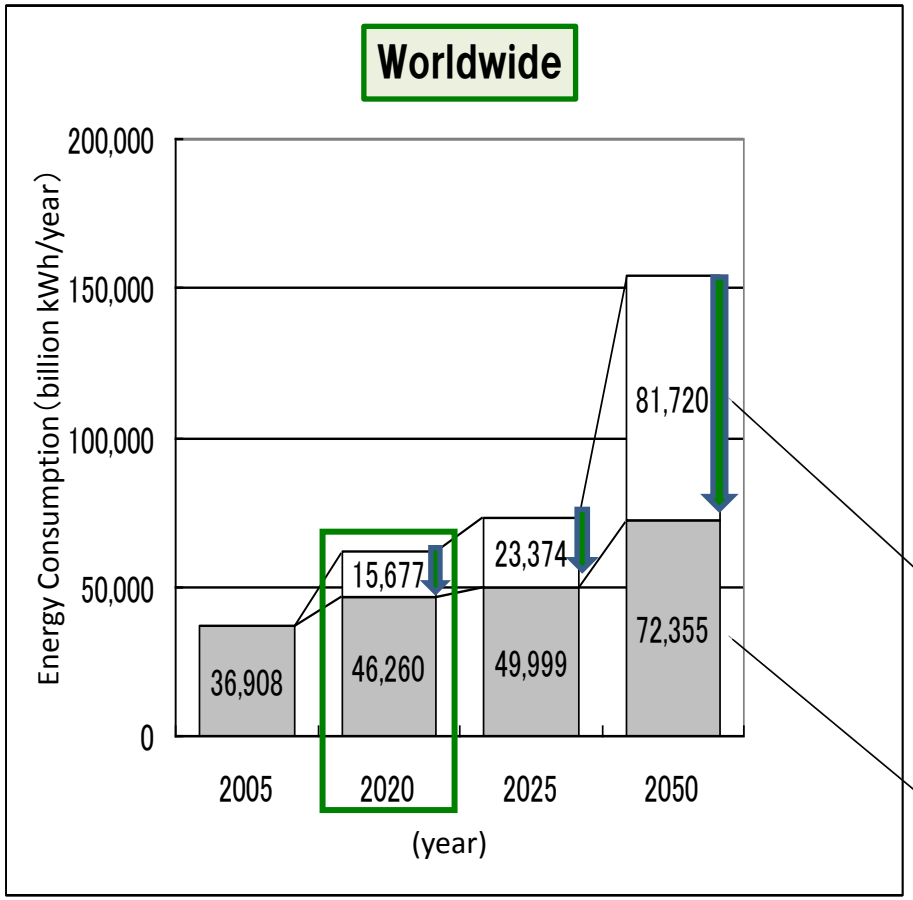


Green by IT

Green of IT

# Estimation of Energy saving Effects of 10 IT equipments(Worldwide 、2020.2025.2050)

**2020 : Reduction of 1,600 billion kWh（CO2: 320~640million ton）**

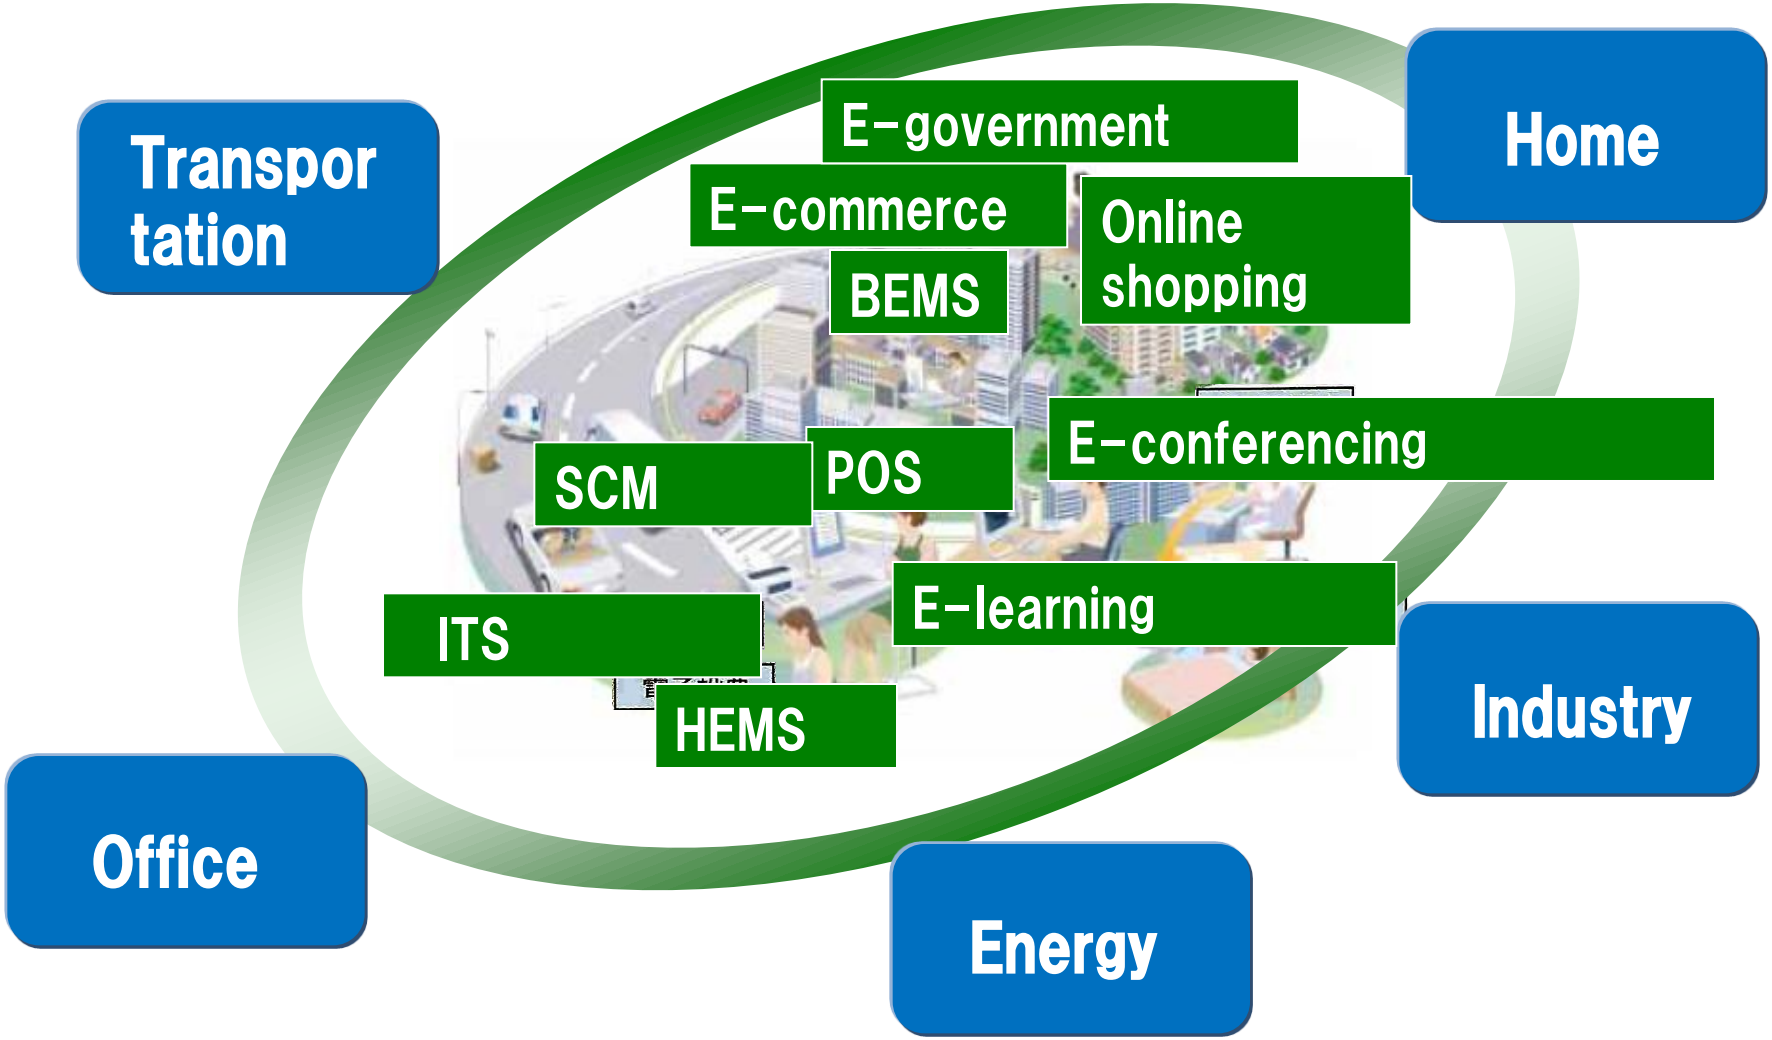


**Energy saving of IT & electronics equipments**

- PC, Server, Storage, Router, Display
- TV, DVD, Lighting, Refrigerator, Air conditioner

**Power consumption of IT & electronics equipments**

# Energy Conservation Effect, Through IT, for Society as a Whole (By IT)

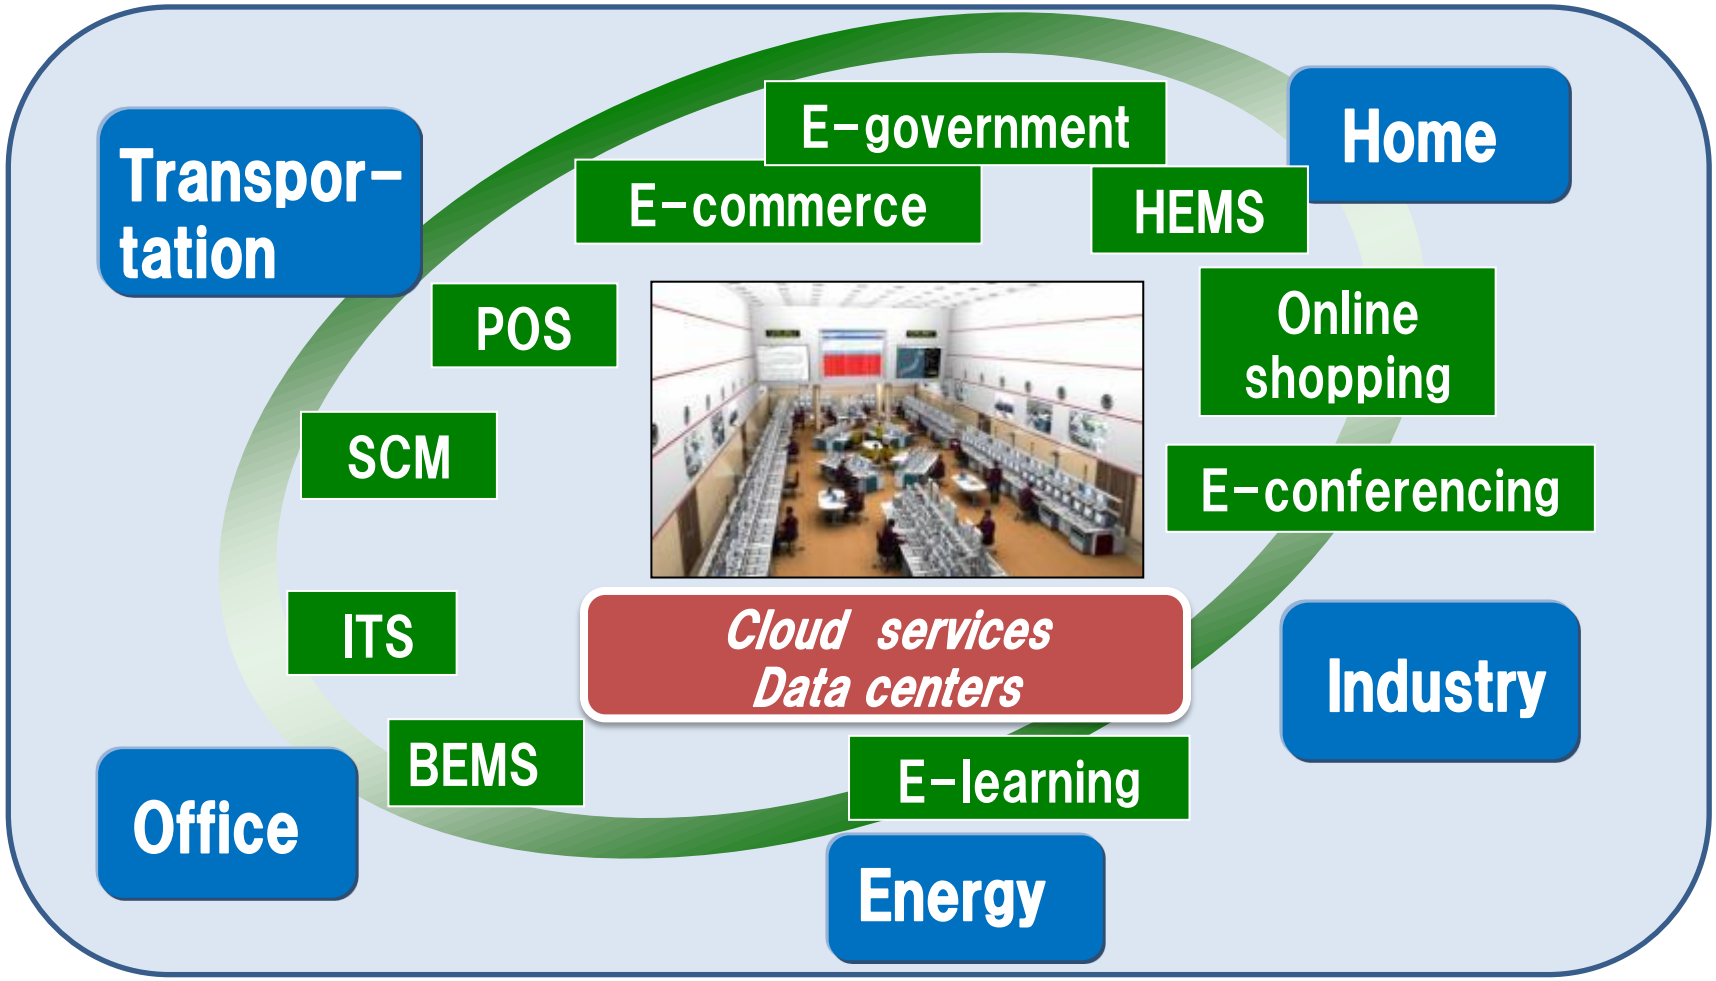


# “Green by IT” effect in 2020

Million ton-CO2/year

| Sector | Major solutions | 2020 GIT effect (Worldwide) |
|---|---|---|
| **Industry** | ・High-performance boiler, energy efficient facilities<br>・Energy management, energy conservation business, etc. | **140～276** |
| **Business** | ・BEMS（Buildings Energy Management System）<br>・Tele-work, TV conference, paperless office | **122～239** |
| **Home** | ・HEMS（home energy management system including digital home appliances）<br>・On-line shopping, electronic content<br>・Introduction of renewable energy, smart grids | **200～393** |
| **Transpor-tation** | ・Improvement of fuel efficiency for automobiles<br>・ITS（ETC, VICS）, Eco-drive<br>・Improvement of efficiency of distribution（SCM・Improvement of loading ratio, etc.） | **1,578～3,101** |
| **TOTAL** | | **2,041～4,009** |

# Importance of cloud services/data centers



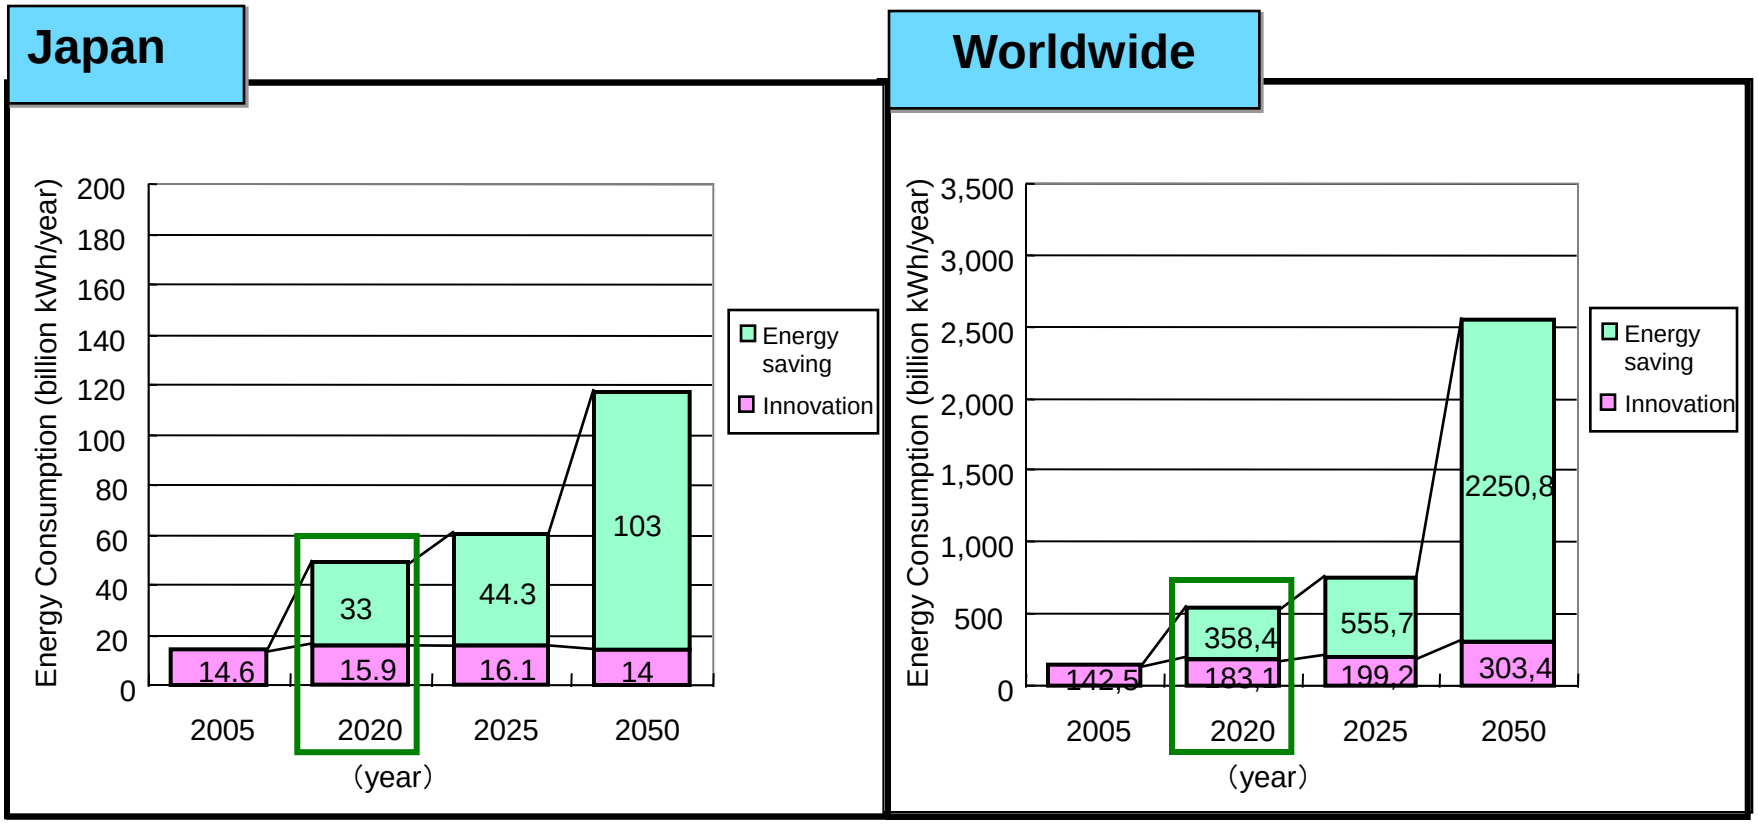
Cloud services and data centers have a critical role to play in ‘smart communities’, which aim to save energy across society as a whole.

# Potential Energy-Saving in Data Centers Through Green IT

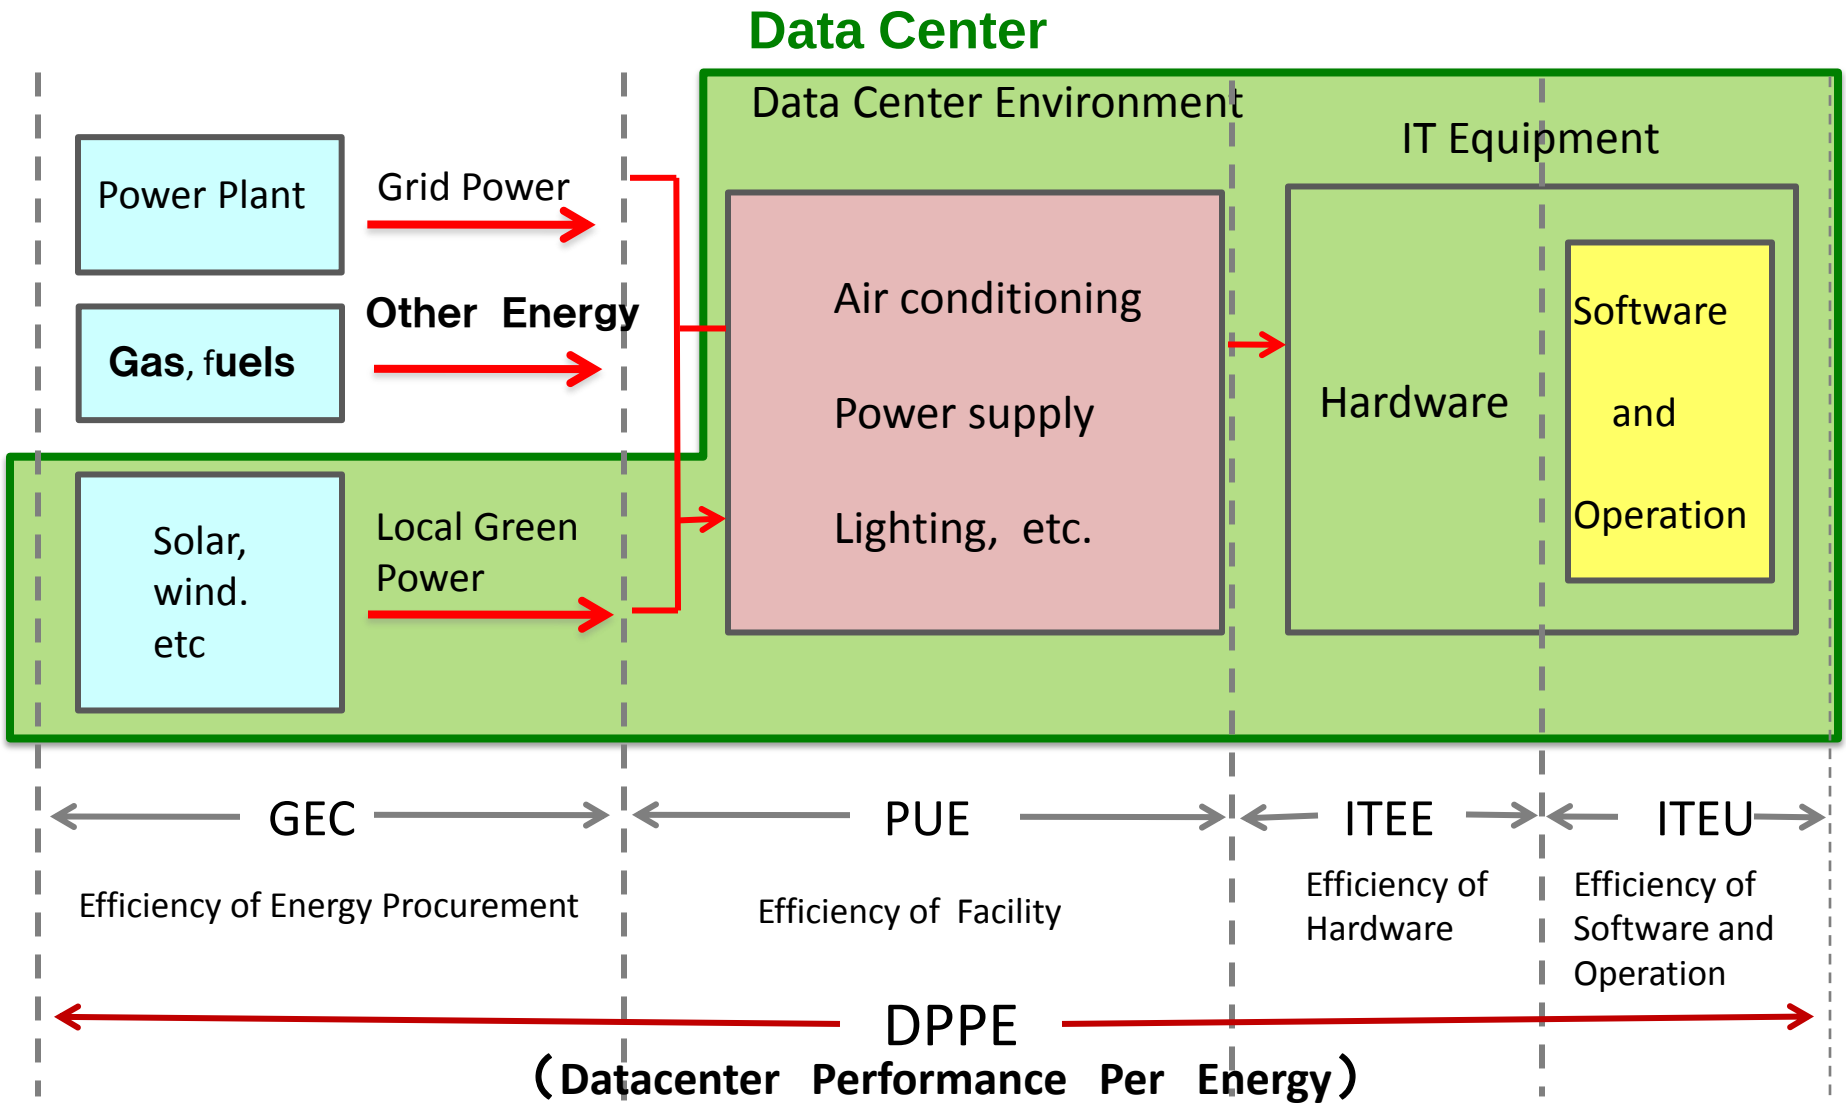
**2020：**

**Japan: Reduction of 33.0 billion kWh （$CO_2$: 6.6-13.2 million tons)**

**Worldwide: Reduction of 358.4 billion kWh （$CO_2$： 70-140 million tons）**



# Datacenter Energy Flow and Metric Boundaries



# International Coordination on Metrics (Japan-US-EU International Workshops)

**GIPC and US and EU organizations (both private and public sector) have held a succession of Japan-US-EU workshops toward the global harmonization of metrics for data center energy efficiency.**
**GIPC has proposed the DPPE metric at the workshops.**

◆**Members**

**JAPAN: METI, GIPC, JEITA**
**US: DOE, EPA, TGG**
**EU: EC, BCS**

◆ **Discussions on DPPE**

| | | |
|---|---|---|
| 1st WS | March 2009 | Washington DC |
| 2nd WS | Feb. 2010 | San Jose |
| 3rd WS | Oct. 2010 | Milan |
| 4th WS | Feb. 2011 | Tokyo (Scheduled) |
| 5th WS | Oct. 2011 | Washington DC |
| 6th WS | Feb. 2012 | Milan |
| 7th WS | Oct. 2012 | Tokyo |

Agreement reached on the Green Energy Coefficient (GEC), Energy Reuse Factor (ERF), and Carbon Usage Effectiveness (CUE) metrics, as well as a holistic framework for comprehensive assessment of facility efficiency, the efficiency of IT equipment and green energy utilization; public statement released

| | | |
|---|---|---|
| 8th WS | Feb. 2013 | Washington DC |

Details discussed of energy efficiency metrics for IT equipment

**［Next meeting］**

| | | |
|---|---|---|
| 9th WS | Oct. 2013 | Europe |

Release of public statement presenting all those items agreed to date

# ISO-IEC JTC1/SC39

## Press release

Green IT Promotion Council

### New Metrics for Data Center Energy Efficiency (DPPE)

【 DPPE (Datacenter Performance per Energy) 】

Survey and Evaluation committee of Green IT Promotion Council (GIPC) is working to make DPPE International Standard Metrics discussing with governments of US, Europe and Japan, and organizations such as The Green Grid. The following is the concept and constitution of DPPE.

New Metrics for Data Center Energy Efficiency

### DPPE Measurement Guidelines

# Green IT International Symposium at CEATEC JAPAN 2012

## Energy-Saving effort in ASIA Session

Dr. Paeng Jung Kook
Chairman, Korea Green Business Association（KGBA）

Mr. Ahamad Zairin Ismail
Senior Vice President
Malaysian Green Technology Corporation（Green Tech）

## Energy-Saving by IT Session

Mr. Stephen Harper
Global Director of Environment and Energy Policy, Legal & Corporate Affairs, Intel Corporation,Co-Chair,
Digital Energy & Sustainability Solutions Campaign (DESSC)

Mr. John Higgins CBE
Director-General DIGITALEUROPE

# Green IT International Symposium at CEATEC JAPAN 2012

Day1: October 4, Room 201, International Conference Hall, Makuhari Messe

## Energy-Saving Efforts in Asia (Session 2)

**Dr. Paeng Jung Kook, Chairman, Korea Green Business Association**

Recognizing the possibility of an energy crisis when Korea is almost entirely dependent on energy imports, the Korean government is working on a range of initiatives using green IT as a national strategy.

**Mr. Ahamad Zairin Ismail, Senior Vice President, Green Tech:**

Importance of trial projects in the energy efficiency initiatives being pursued in Malaysia's various industrial sectors.

## Energy Saving 'by IT' (Session 3)

**Mr. Stephen Harper, Co-Chair, Digital Energy & Sustainability Solutions Campaign:**

ICT solutions can help society to become more energy-efficient and combat climate change, but because marketing strategies are not going as well as they might, this potential is not sufficiently recognized.

**Mr. John Higgins, Director-General, DIGITALEUROPE:**

The EC's Environment Directorate-General is considering an LCA-based footprint policy but industry is concerned about the possible introduction of tight regulations.

# Green IT Awards

○ The Green IT Promotion Council established the Green IT Awards in 2008 to encourage green IT efforts by industry and academic bodies. The awards include the “Minister of Economy, Trade and Industry Award” and “Commerce and Information Policy Bureau Director-General Award”, etc., for “of IT” and “by IT”.

## by IT

### Minister of Economy, Trade and Industry Award

**Azbil Corporation**

Energy- and power-saving solution that uses a remote server and data simulation technology

### Commerce and Information Policy Bureau Director-General Award

**Fujitsu Limited**

FGCP/S5 cloud computing platform that helps conserve the global environment

## of IT

### Minister of Economy, Trade and Industry Award

**NTT Data Intellilink Corporation, Japan Radio Co., Ltd. and NTT Data Corporation**

Ultra-energy-saving power supply system for data centers

### Commerce and Information Policy Bureau Director-General Award

**Internet Initiative Japan Inc.**

Matsue Data Center Park

# Best Practices

**A number of best practices were collected into a handbook to provide Information to those offshore about Japan's green IT products and examples of green IT in use. This is the third year that a handbook has been created.**

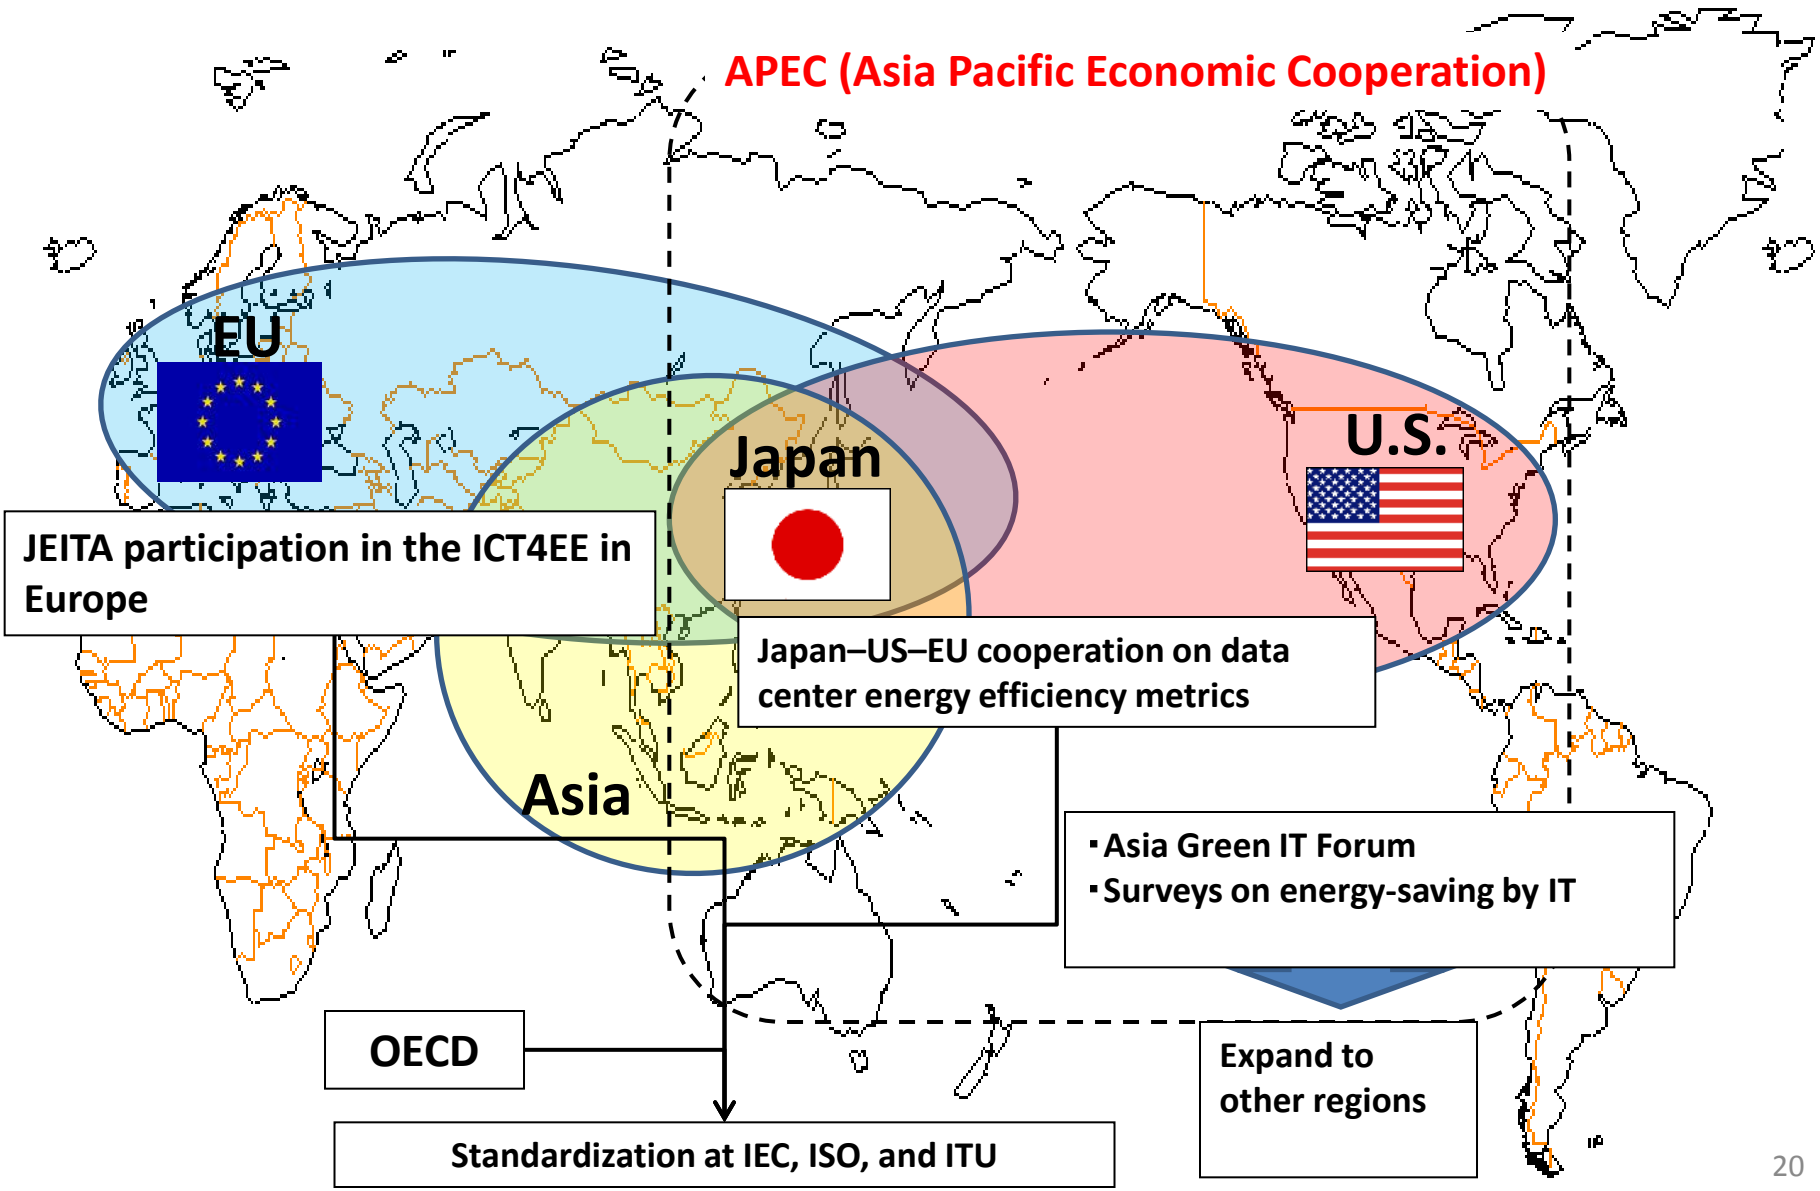
## Example of green IT product information

**Introduction of the latest green IT technologies and products from member companies through the GIPC website**

**http://home.jeita.or.jp/greenit-pc/bestpractice/**

# 3. Enhancing International Cooperation

# Japanese Policy Cooperation in the International Arena



# Asia Green IT Forum

**The Asia Green IT Forum consists of 11 Asian countries/regions, and has been held once a year since 2009. The members are government and industry representatives. They exchange information about policies and industrial trends related to Green IT in each country/region. We agree on a Joint Statement at each forum.**

## ◆ Participating countries/regions

**China / Chinese Taipei / India (MAIT) / Indonesia / Japan / Korea / Malaysia / Philippines / Singapore / Thailand / Vietnam**

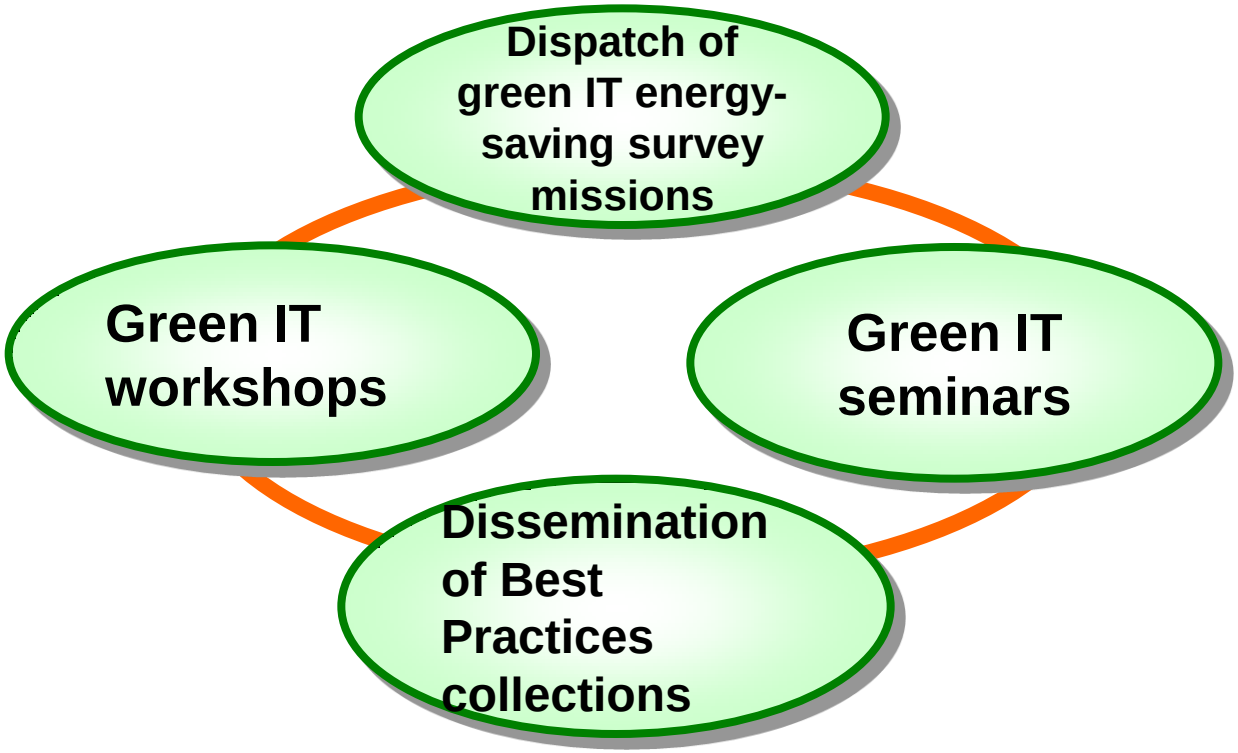
## ◆ History

2009 : 1st Forum (Japan)
2010 : 2nd Forum (Japan)
2011 : 3rd Forum (Korea)
2012 : 4th Forum (Korea)
2013 : 5th Forum (Philippines)

# Enhancing International Cooperation (in Asia): Surveys on Energy-Saving "by IT" in Asia

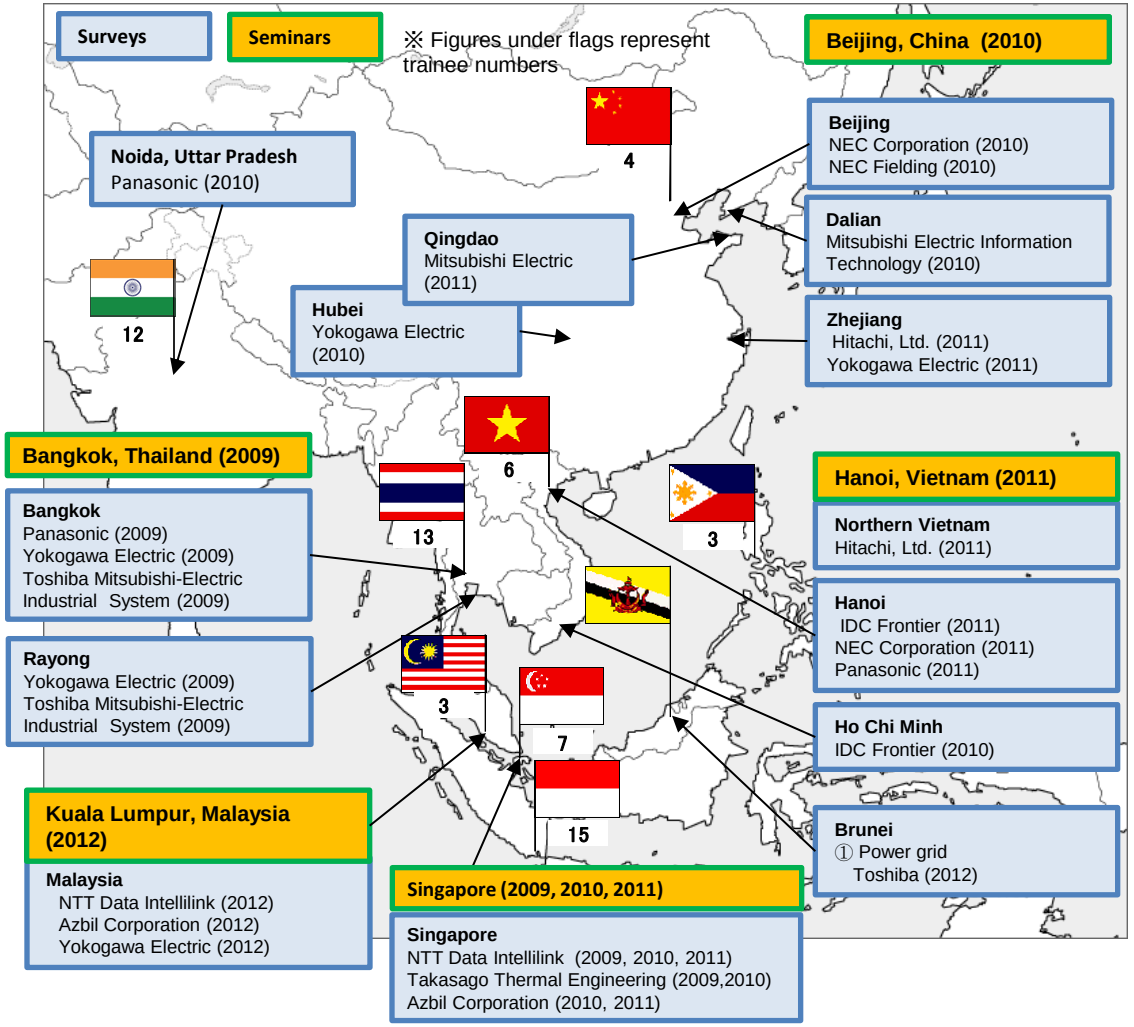
**The government of Japan arranges surveys on energy saving "by IT" which utilize advanced Japanese energy saving/control technologies in Asian countries.**

**GIPC member companies conduct surveys in the following facilities.**



# Which companies and where (FY2009-2012)

• Energy-saving missions, seminars and trainees intakes targeting the Asian region between FY2009 and FY2012 were as follows.



| | Surveys | Seminars | Trainee intakes | Expert dispatch |
|---|---|---|---|---|
| 2009 | 6 | 2 | 12 from 2 countries | - |
| 2010 | 8 | 2 | 10 from 3 countries | - |
| 2011 | 8 | 2 | 25 from 7 countries | Malaysia |
| 2012 | 4 | 1 | 20 from 2 countries | India |
| Total | 26 | 7 | 62 from 8 countries | 2 |

# Training Program on Green IT for Asia

## Training in Japan

**Green IT professionals from industry, business and government sectors from Asian countries are invited to Japan to learn about green IT initiatives and cases.**

<7-14 October 2011>
Trainees: 30 people
China, Singapore, Vietnam, Malaysia, Thailand, India, Indonesia and the Philippines

<1-5 October 2012>
Trainees: 20 people
Malaysia and India

# CO2 emissions / GDP using exchange rates（2010）
