

Promoting the Green IT Initiative in Japan

26 August 2013

Japan Electronics and Information Technology
Industries Association(JEITA) /
Green IT Promotion Council(GIPC)

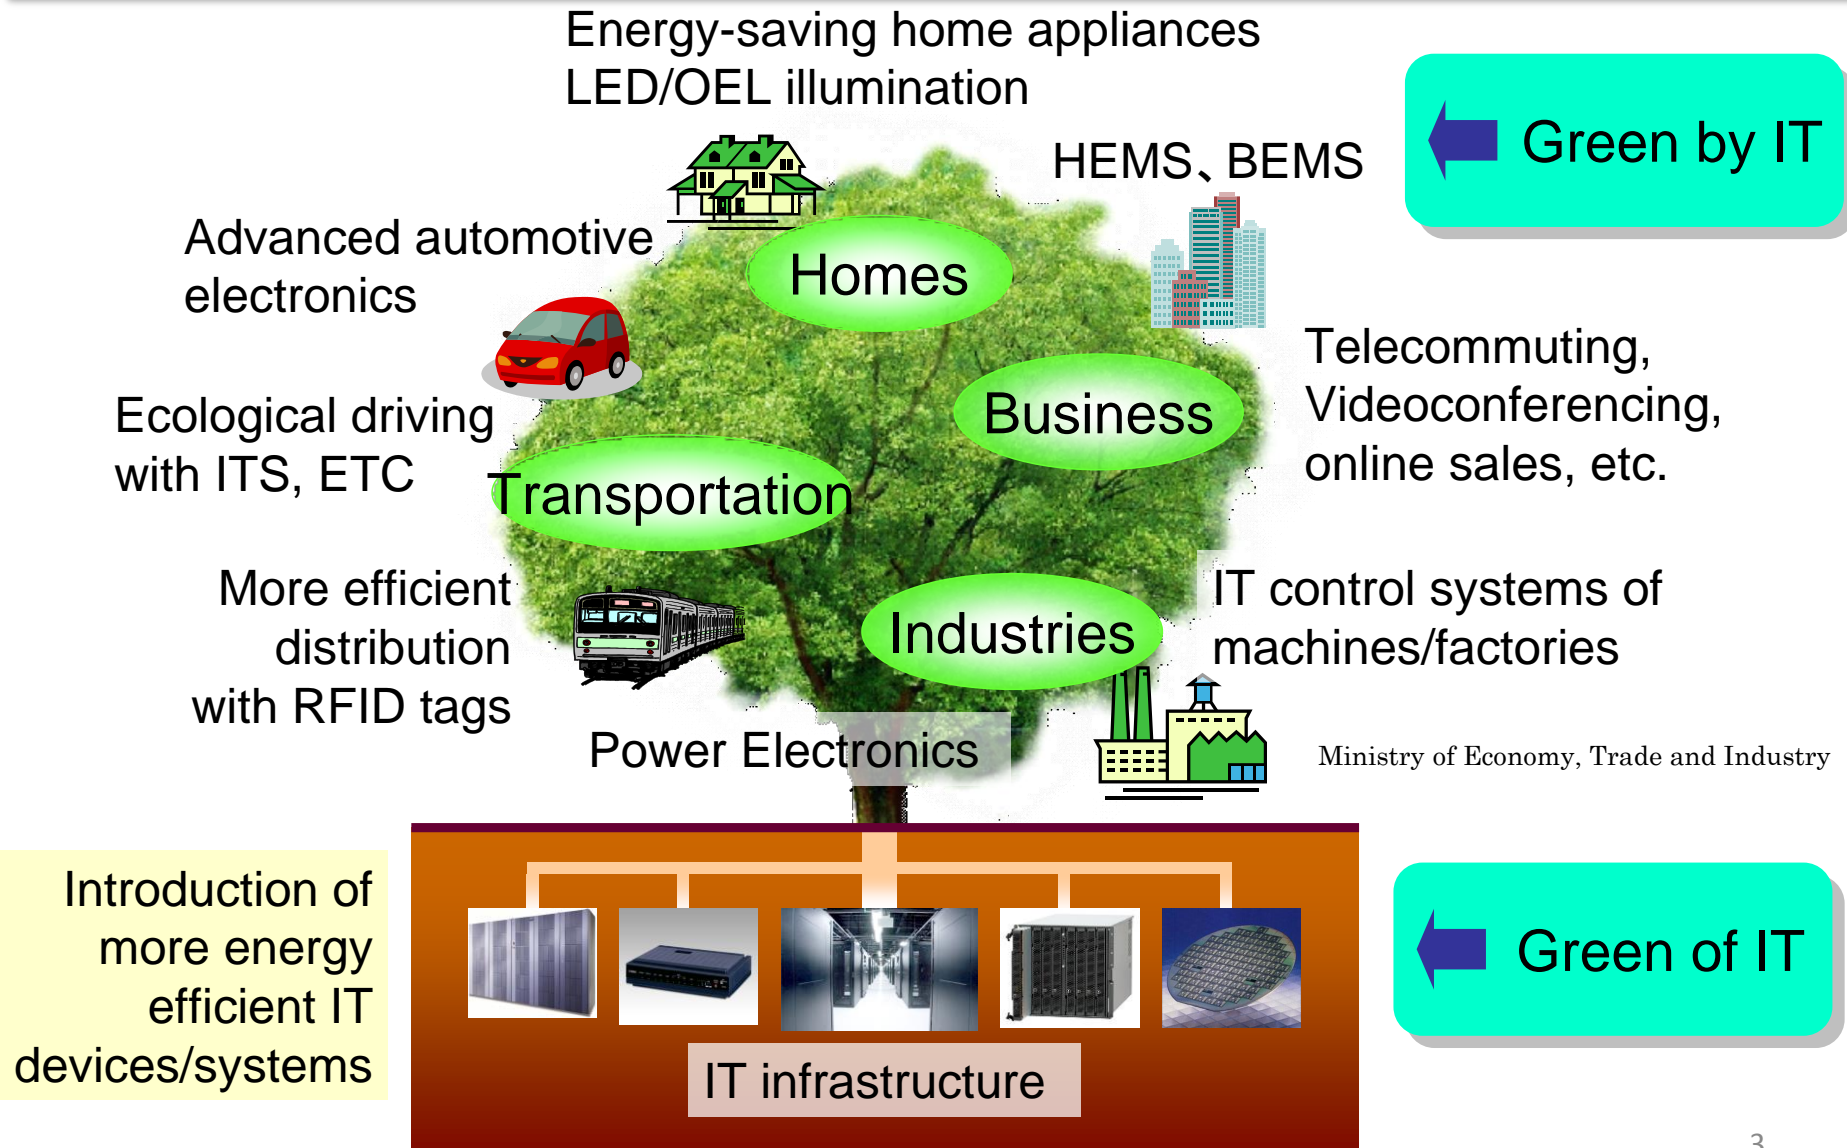

JEITA

1. Significance of Green IT

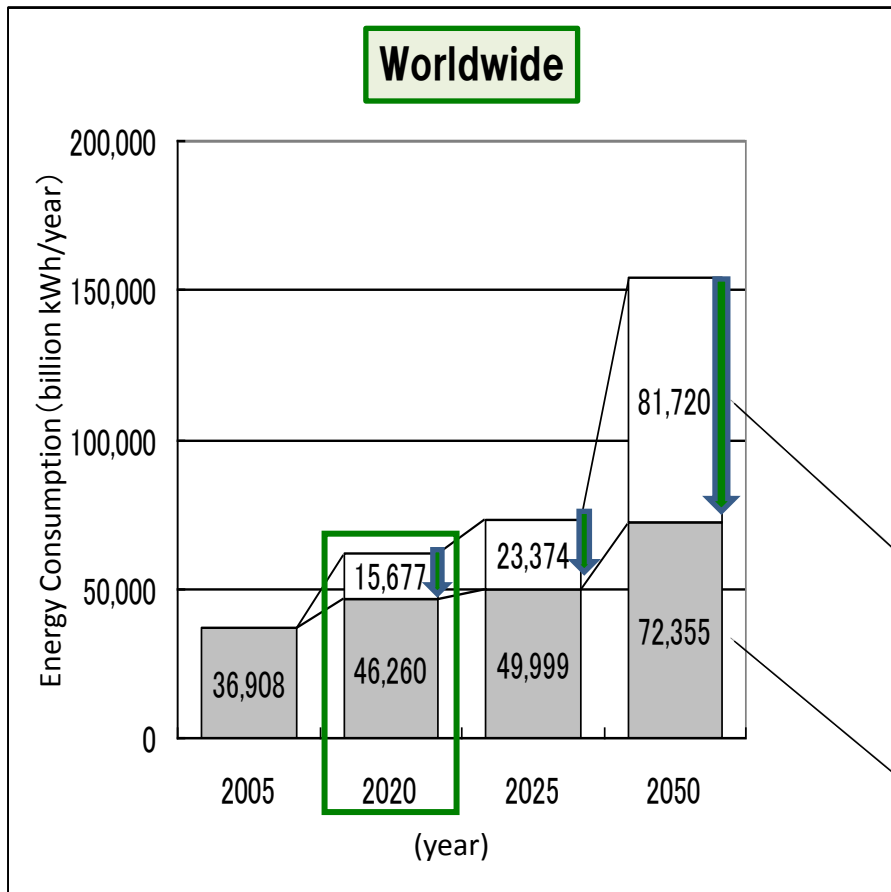

Concept of Green IT

IT equipment in every field has great potential to help save energy

Estimation of Energy saving Effects of 10 IT equipment (Worldwide, 2020.2025.2050)

2020 : Reduction of 1,600 billion kWh (CO2: 320~640million ton)

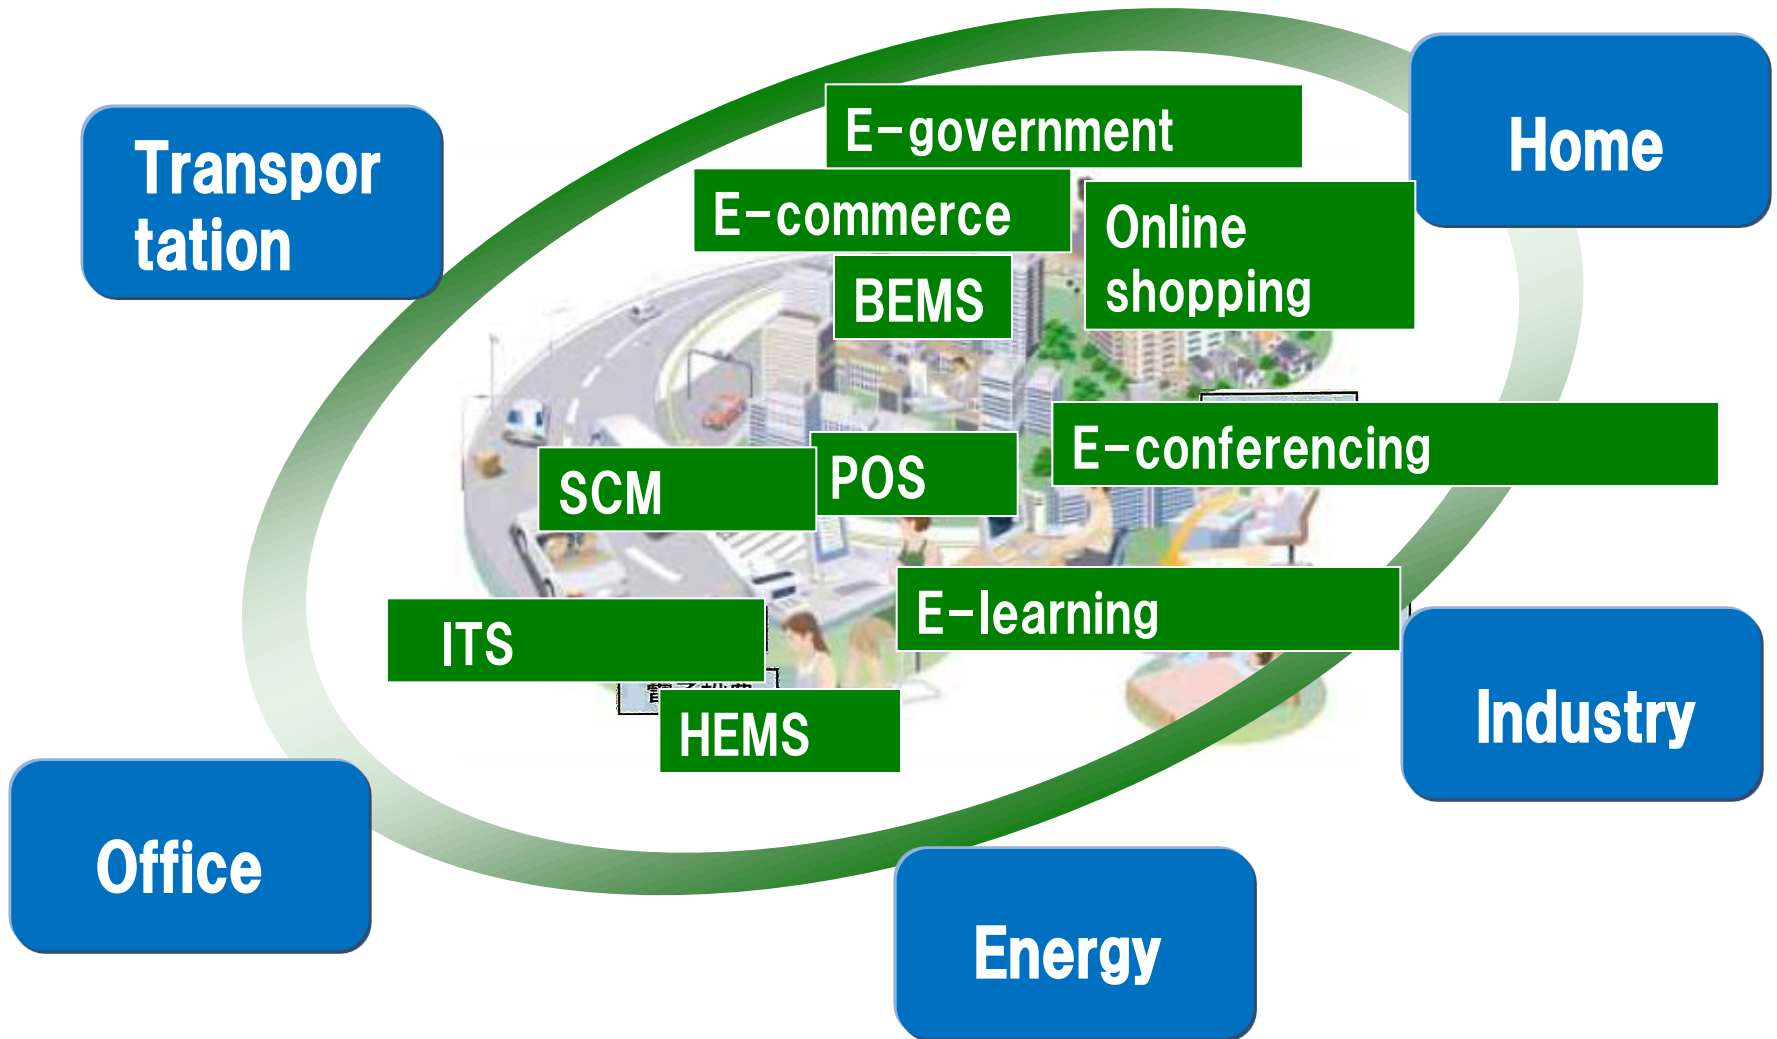

Energy saving of IT & electronics equipment

- PC, Server, Storage, Router, Display
- TV, DVD, Lighting, Refrigerator, Air conditioner

Power consumption of IT & electronics equipments

Energy Conservation Effect, Through IT, for Society as a Whole (By IT)

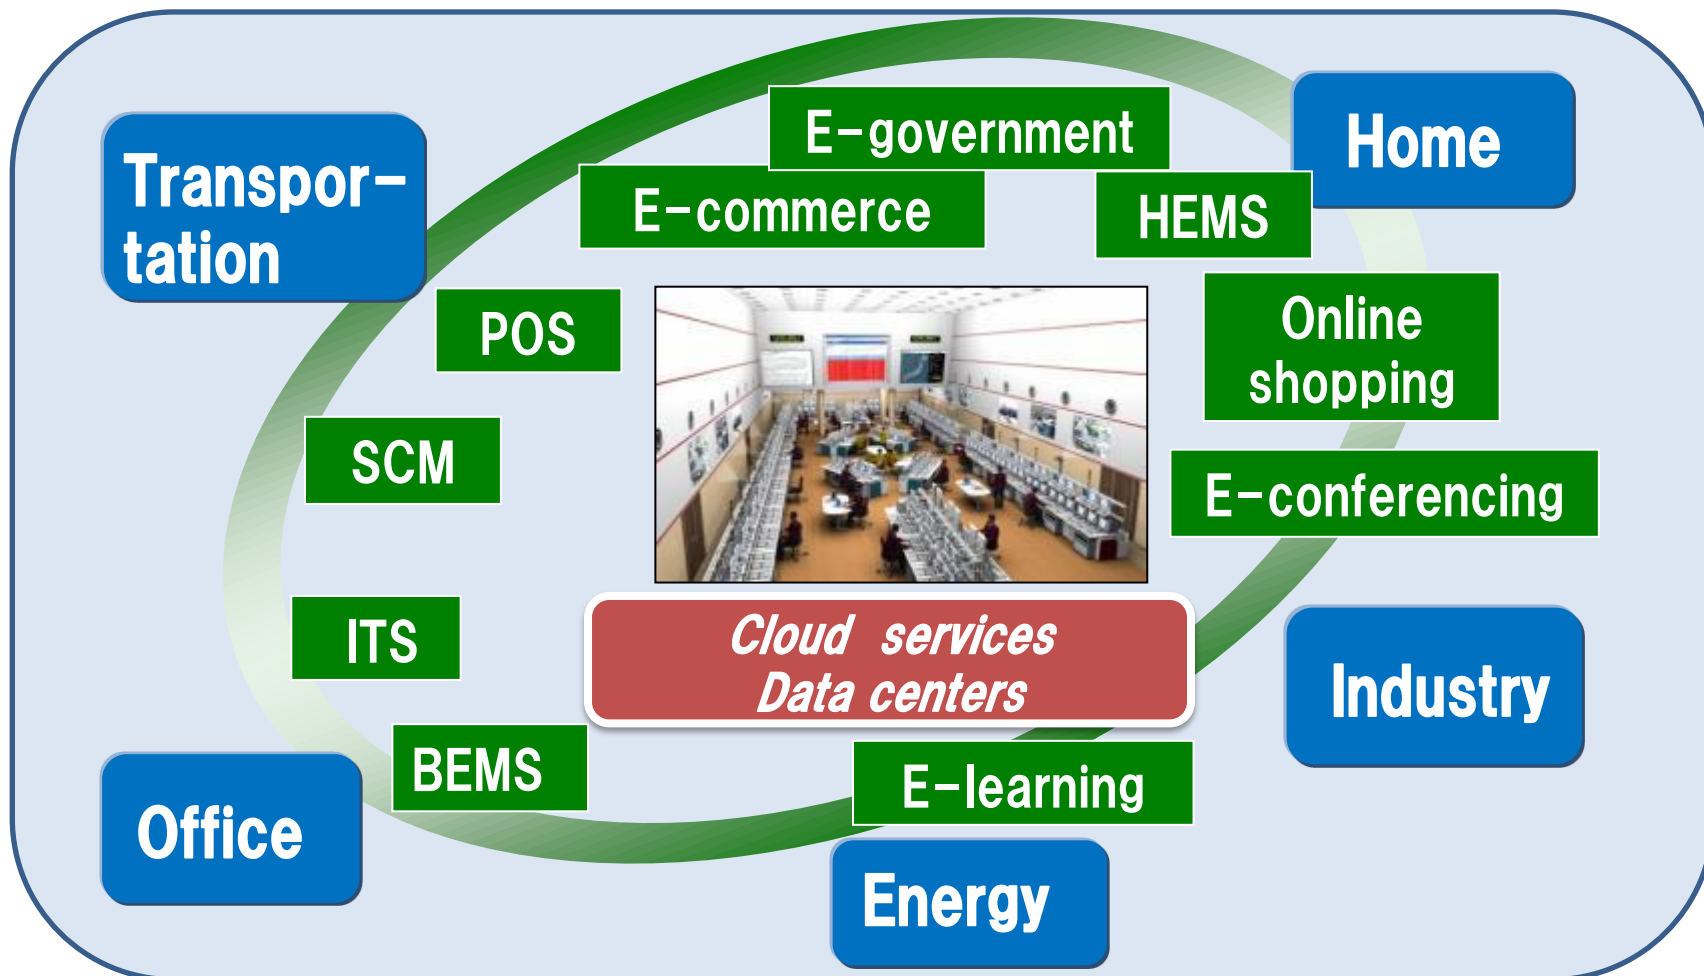

“Green by IT” effect in 2020

Million ton-CO₂/year

Sector	Major solutions	2020 GIT effect (Worldwide)
Industry	<ul style="list-style-type: none"> ▪ High-performance boiler, energy efficient facilities ▪ Energy management, energy conservation business, etc. 	140~276
Business	<ul style="list-style-type: none"> ▪ BEMS (Buildings Energy Management System) ▪ Tele-work, TV conference, paperless office 	122~239
Home	<ul style="list-style-type: none"> ▪ HEMS (home energy management system including digital home appliances) ▪ On-line shopping, electronic content ▪ Introduction of renewable energy, smart grids 	200~393
Transportation	<ul style="list-style-type: none"> ▪ Improvement of fuel efficiency for automobiles ▪ ITS (ETC, VICS), Eco-drive ▪ Improvement of efficiency of distribution (SCM・Improvement of loading ratio, etc.) 	1,578~3,101
TOTAL		2,041~4,009

Importance of cloud services/data centers

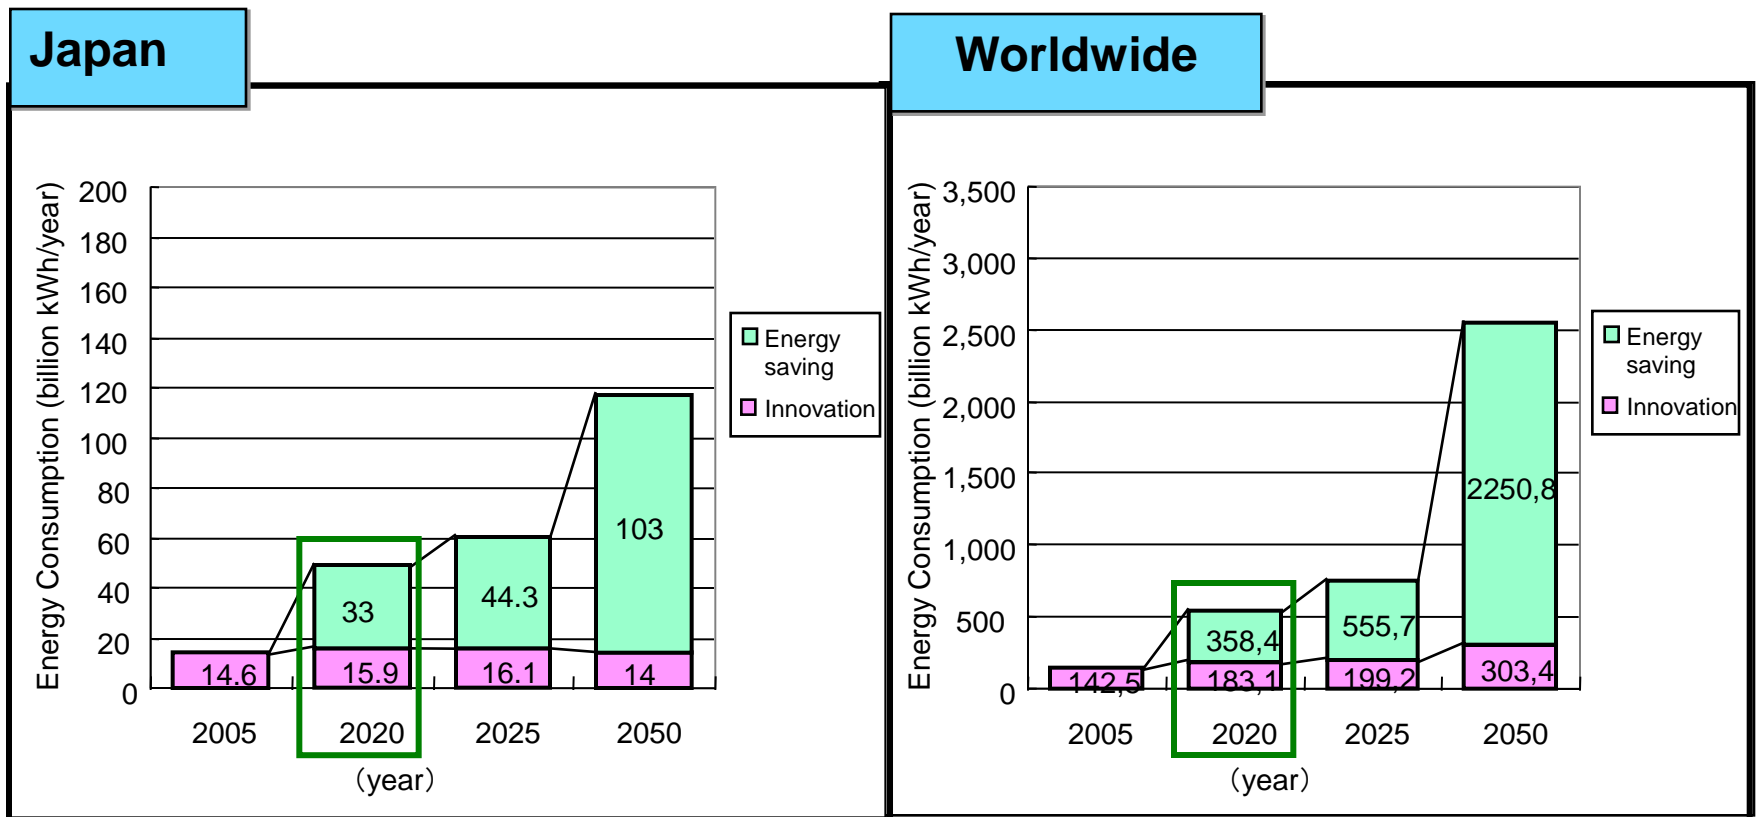

Cloud services and data centers have a critical role to play in 'smart communities', which aim to save energy across society as a whole.

Potential Energy-Saving in Data Centers Through Green IT

2020 :

Japan: Reduction of 33.0 billion kWh (CO₂: 6.6-13.2 million tons)

Worldwide: Reduction of 358.4 billion kWh (CO₂ : 70-140 million tons)

DPPE metric for data center energy efficiency

Best Practices

A number of best practices were collected into a handbook to provide Information to those offshore about Japan's green IT products and examples of green IT in use. This is the third year that a handbook has been created.

Example of green IT product information

Introduction of the latest green IT technologies and products from member companies through the GIPC website

ベストプラクティス集 The Best Practice Collection

ベストプラクティス集のPDFはこちらから Click below for PDF download.

- 2012 edition 2012年度版 PDF
- 2011 edition 2011年度版 PDF
- 2010 edition 2010年度版 PDF
- 2009 edition 2009年度版 PDF

Best Practice

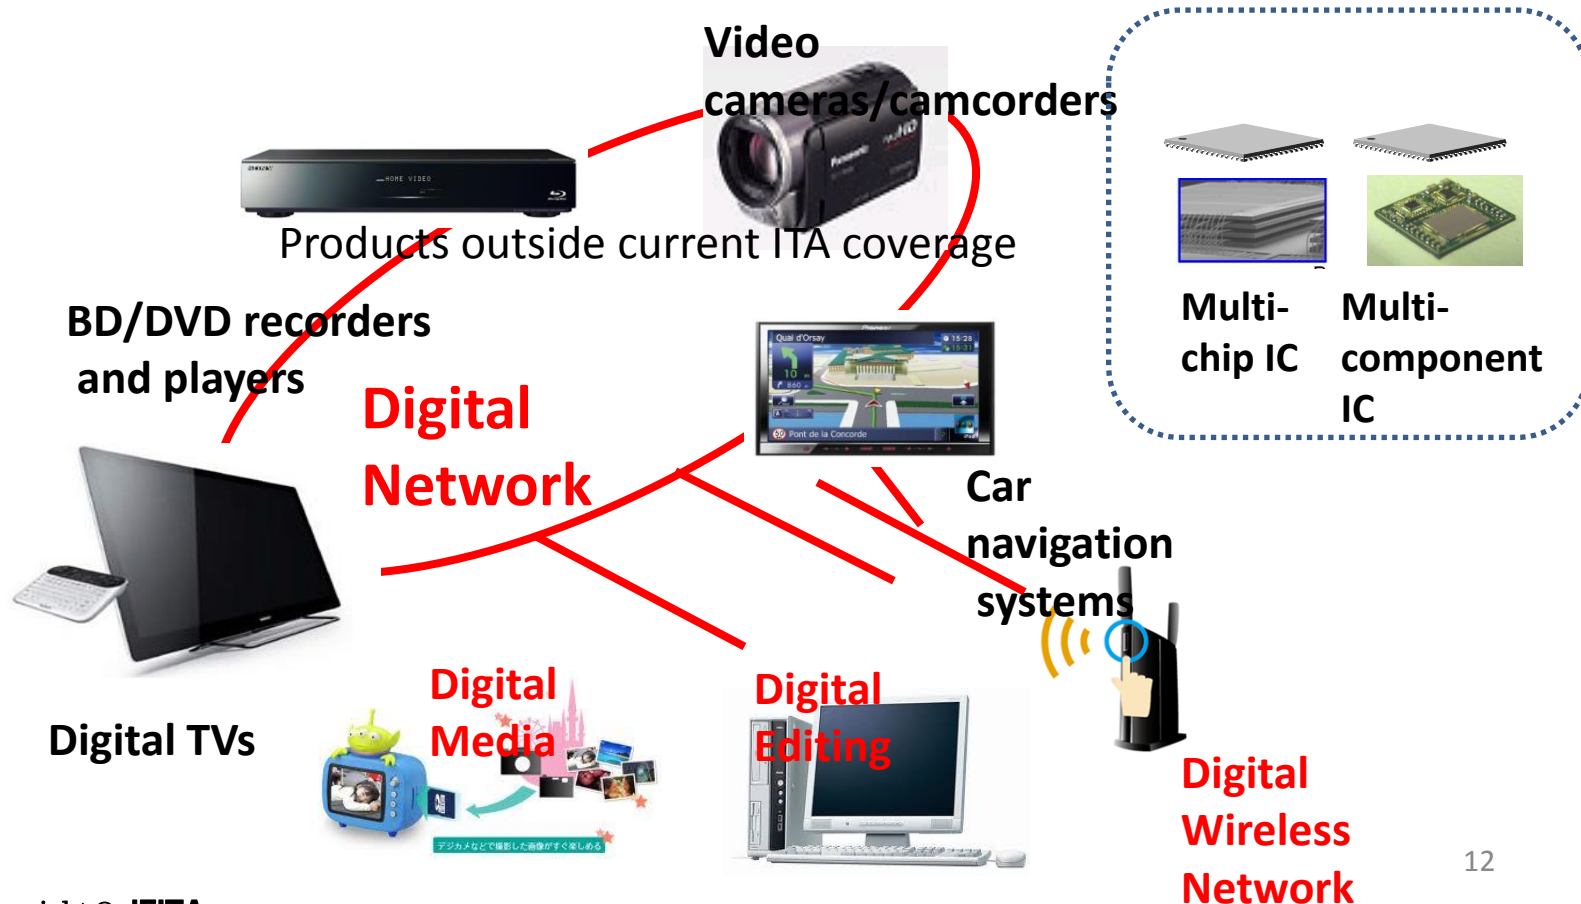

- データセンタ評価指標 (DPPE)
- グリーンIT推進協議会 活動報告書
- 連携制御
- 節電に向けたグリーンITの活用

Promoting ITA Expansion

- ITA formed in 1996 to
eliminate duties on IT products
- ITA 76 member countries and regions
97% of trade of IT products
- ITA contributes to an advanced information society, improves myriad conveniences in our daily lives, and spurs growth and innovation
- ITA expansion will further promote the unimpeded distribution of IT and electronics products with a strong environmental performance and consequently contribute substantially to
green IT promotion

Products outside current ITA coverage

- Product scope of the agreement has not been expanded for the past 15 years.
- Many new and innovative products are not covered by ITA

ITA membership

ITA members (77 nations/regions)

Japan, US, EU(28), Taiwan, Korea, Costa Rica, Malaysia, Australia, Canada, Thailand, Norway, China, Switzerland, Liechtenstein, Singapore, Hong Kong, Philippines, NZ, Israel, Croatia, Mauritius, Montenegro, Turkey, El Salvador, Guatemala, Iceland, Dominica

ITA Expansion negotiation by 53 nations/regions

India, Columbia, **Indonesia**, Macao, Oman, Peru, Saudi Arabia, Ukraine, Bahrain, UAE, Vietnam, Nicaragua, Panama, Albania, Egypt, Georgia, Honduras, Jordan, Kuwait, Kyrgyzstan, Moldova, Morocco, Tajikistan

Current status of negotiations

Planned target

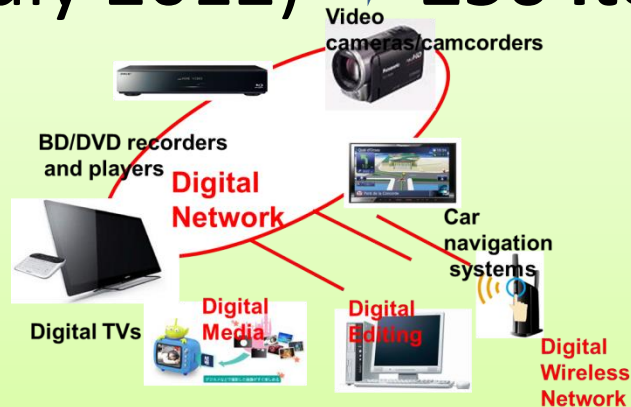

- Substantial agreement by July 2013 ???
 - Adoption of final agreement at the WTO Ministerial Meeting in Bali in December 2013
- ⇒ **Need more support from Asian countries for successful conclusion**

Refine items list

360 items (July 2012)

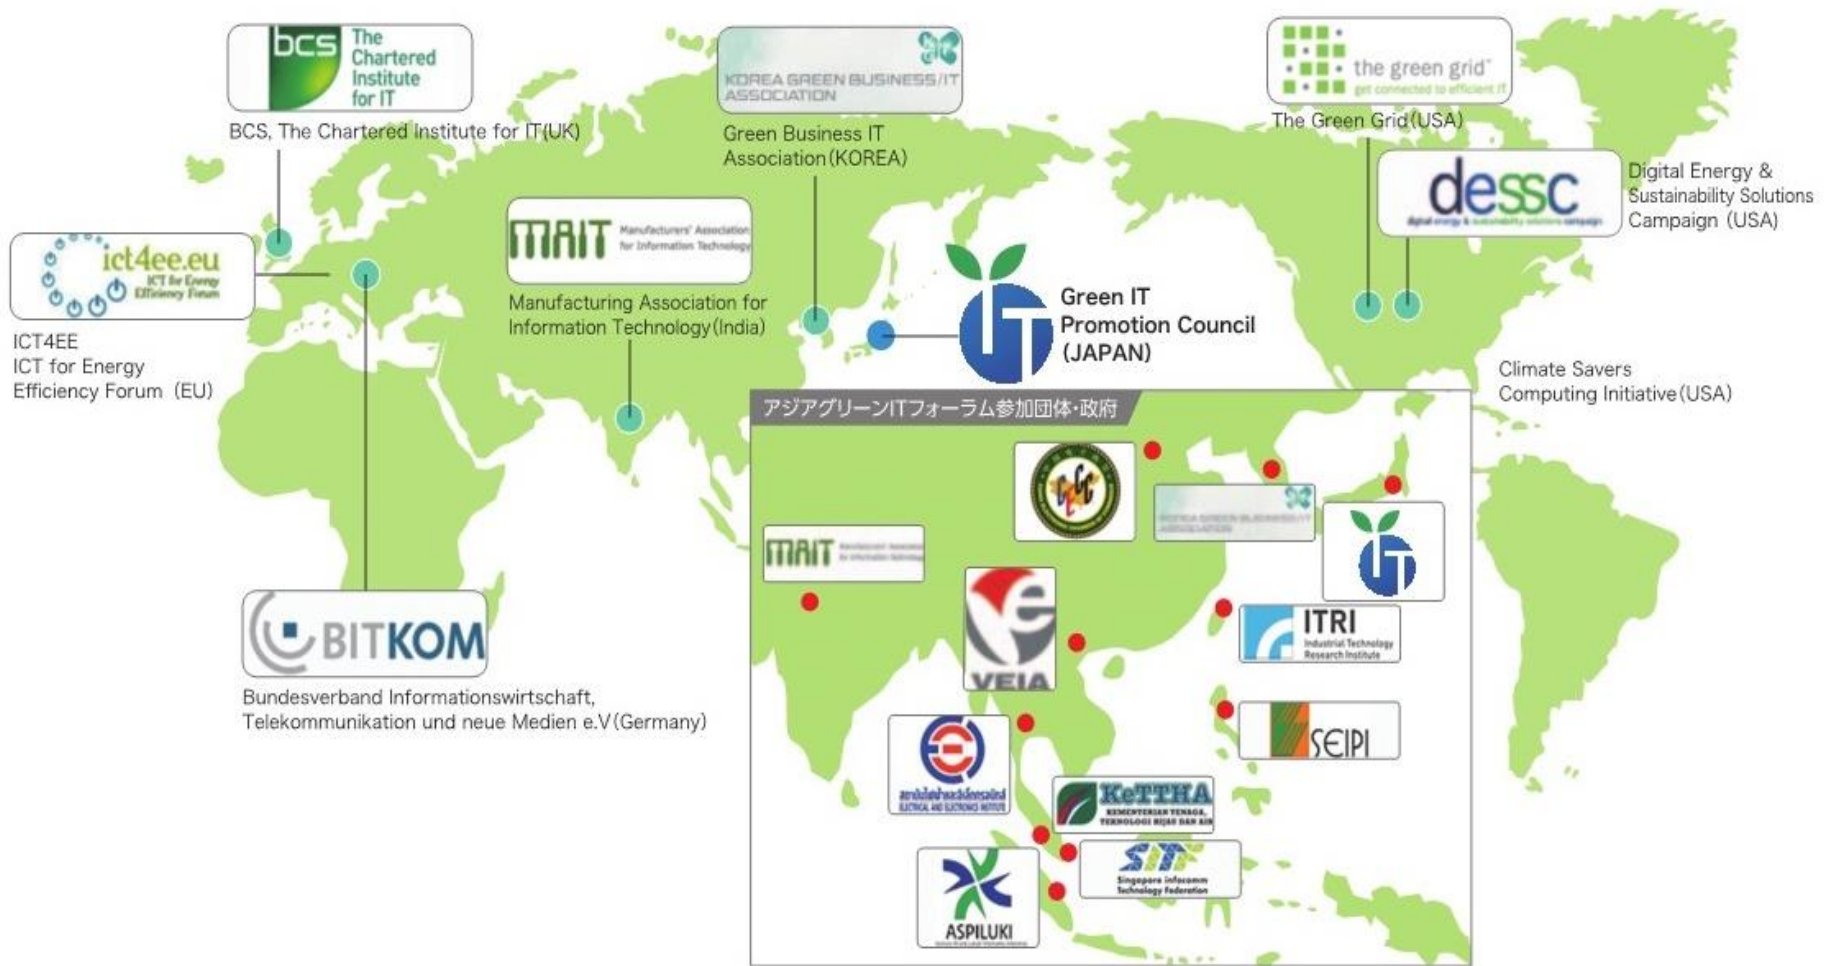

256 items (July 2013)

2. Enhancing International Cooperation

Japanese Policy Cooperation in the International Arena

Asia Green IT Forum

The Asia Green IT Forum consists of 11 Asian countries/regions, and has been held once a year since 2009. The members are government and industry representatives. They exchange information about policies and industrial trends related to Green IT in each country/region. We agree on a Joint Statement at each forum.

◆ Participating countries/regions

China / Chinese Taipei / India (MAIT) / Indonesia / Japan / Korea / Malaysia / Philippines / Singapore / Thailand / Vietnam

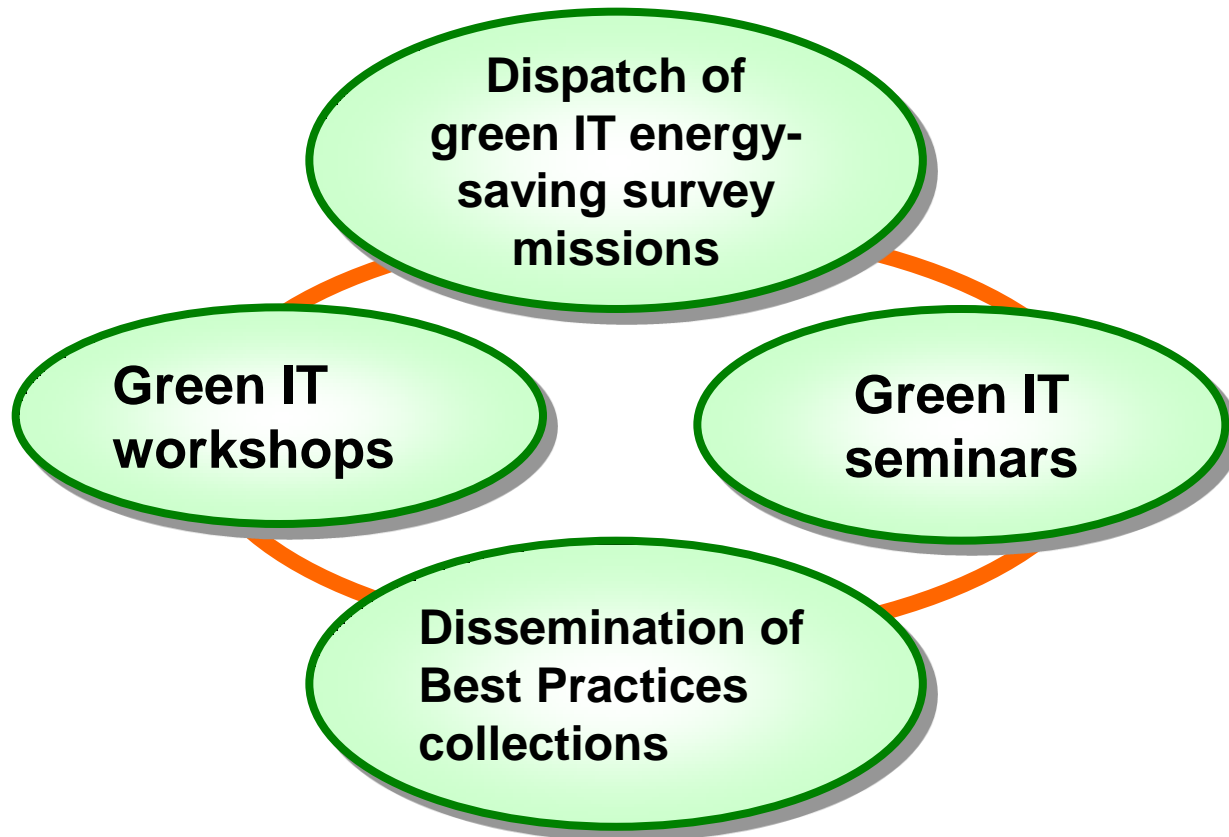

◆ History

- 2009 : 1st Forum (Japan)
- 2010 : 2nd Forum (Japan)
- 2011 : 3rd Forum (Korea)
- 2012 : 4th Forum (Korea)
- 2013 June : 5th Forum (Philippines)
- 2014 June : 6th Forum (Philippines)**
- 2015 Feb. : 7th Forum (Indonesia)**

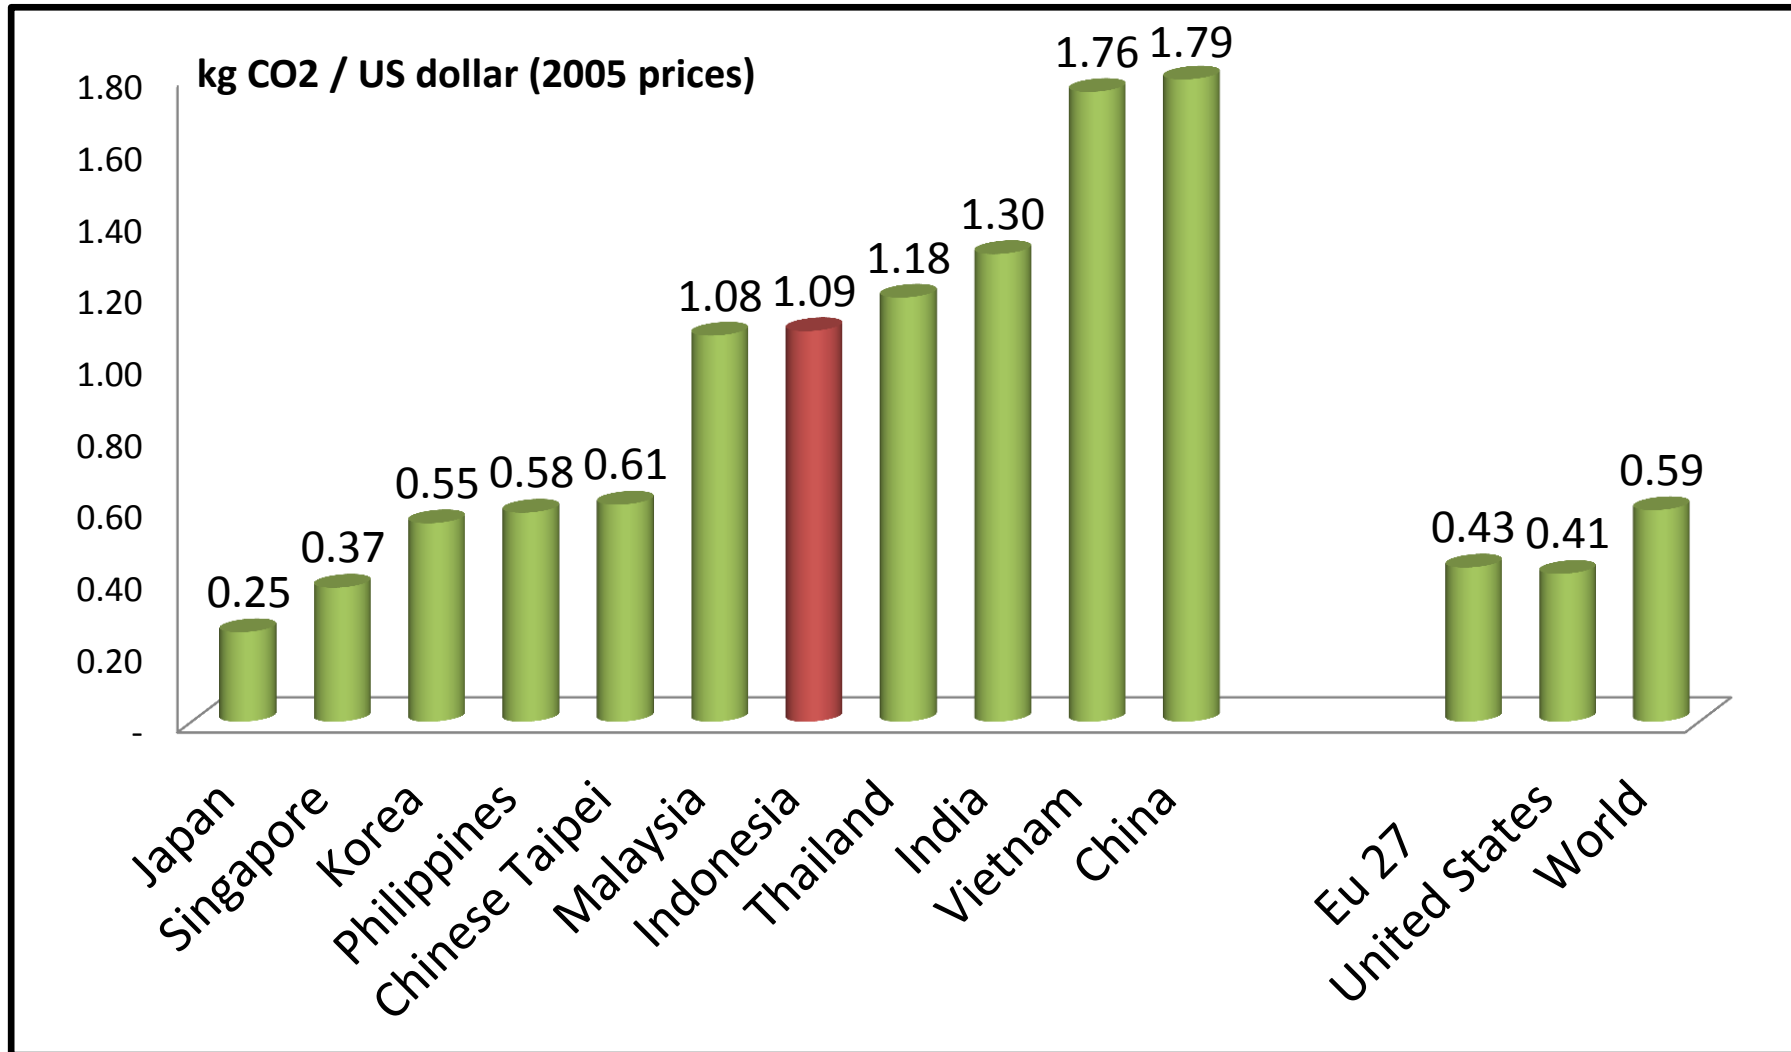

Enhancing International Cooperation in Asia

The government of Japan arranges surveys on energy saving “by IT” which utilize advanced Japanese energy saving/control technologies in Asian countries.

CO2 emissions / GDP using exchange rates (2010)
