## Conflict Minerals Reporting Template

The Conflict Minerals Reporting Template (CMRT) is a free, standardized reporting template developed by the Responsible Minerals Initiative (RMI) that facilitates the transfer of information through the supply chain regarding mineral country of origin and the smelters and refiners being utilized. The template also facilitates the identification of new smelters and refiners to potentially undergo an audit via the RMI's Responsible Minerals Assurance Process (RMAP).

### Download the CMRT Template

Download the latest version of the CMRT (version 6.22) below. Click [here](#) for a downloadable version of the most up-to-date Smelter Reference List and [here](#) for the revision history. The RMI recommends using CMRT v. 6.01 or higher for the Reporting Year.

Conflict Affected and High-Risk Areas

## Conflict Affected and High-Risk Areas (CAHRAs)

The RMI encourages responsible sourcing from conflict affected and high risk areas (CAHRAs). The RMI does not provide lists of countries that may be conflict-free or conflict-affected. The nature of conflict is ever-changing, while some conflicts may be country-wide, many conflict-related and high-risk incidents are concentrated on a regional or local level, or involve individual sites, entities, and actors. Once companies identify which conflict-affected and high-risk areas they are sourcing from, both country-level risk assessments and individual supplier due diligence are critical to ensure responsible sourcing of minerals from CAHRAs. In alignment with the [OECD Due Diligence Guidance](#), the RMI provides tools and resources to enable companies to conduct individual and collective due diligence within supply chains to source minerals responsibly.

### Indicative, non exhaustive list of **CONFLICT-AFFECTED AND HIGH-RISK AREAS** under Regulation (EU) 2017/821

The website presents an indicative, non-exhaustive, and regularly updated list of conflict-affected and high-risk areas (CAHRAs) (as defined under Regulation 2017/821). This website was developed with funding from the European Union through call for tenders N° TRADE2018/G3/G11 (Revised).

This website and its underlying project are to be understood in the broader context of the European Commission's **work on trade in general and responsible sourcing of minerals in particular**. The objective of this project and of the CAHRAs list presented on this website is to facilitate due diligence efforts of European Union importers of minerals and metals falling under Regulation (EU) 2017/821. Information available through this website should be seen as indicative, not exhaustive, and as constituting only a part of, and is not intended to substitute and cannot replace, the broader due diligence efforts required to be conducted by relevant organisations and companies. Therefore, no reliance can and should be placed on the use of this website in respect of contributing to or meeting a person, organisation or company's legal obligations in relation to Regulation (EU) 2017/821.

It must be noted that importers sourcing from areas which are not mentioned on the list presented on this website remain responsible for complying with the due diligence obligations under Regulation 2017/821. Neither RAND Europe nor the European Commission (as contracting authority) assume any responsibility or liability in relation to the contents of this website nor the use of those contents. Equally, the inclusion of an area in the website's CAHRAs list does not prohibit, imply, or suggest that business activities should not be conducted in this area, assuming that due diligence obligations are properly fulfilled.

The information and views set out in this website are those of the authors and do not necessarily reflect the official opinion of the European Commission. Neither RAND Europe nor the Commission guarantee the accuracy of the data included in this list. Neither the RAND Europe, the Commission nor any person acting on its behalf may be held responsible for the use which may be made of the information contained therein.

This website and its reports are not official documents. Care has been taken to ensure the accuracy of the information contained within the website and the indicative, non-exhaustive list, but no responsibility can be accepted by the European Commission, RAND Europe, or the data providers for any inadvertent errors or omissions.
